The Sensation Petunia

The Finest and Best for Window Boxes or the Open Ground See Front Cover for Illustration

54700 A true Elk's Purple. For several years we have been singing the praises of this gorgeous Petunia. In our opinion there is absolutely no other Petunia to compare with it. It's the true Aristocrat of the Petunia family. No other Petunia can make so beautiful a window box. No other Petunia excels it in the open garden, either alone or in mass beds.

It's the richest and most beautiful royal purple Petunia in the world. Has a texture that looks like velvet. Has a sheen unknown in any Petunia. It has all the requisites for a desirable garden variety. It is a robust grower; stands grief. It literally blooms its head off. Just a wealth of color from early summer until freeze-up. For window boxes it is the king of them all. It is unsurpassed used with any color.

If you want the most beautiful bed of Petunias or window box in your neighborhood, please try this Aristocrat. **Pkt. 50c; 3 for \$1.25. Postpaid.**

See Opposite Page for
Color Illustration.

11630 The illustration on the opposite page is sufficient to "mental view" this marvelous Palm-like hardy plant in any location in any garden, which we offer for the first time this year. Against a background of snow it is an imposing sight. Against shrubbery or in the open it presents a dazzling effect. Nothing more like the magnificent beautiful Palm-like Pandanus could be created. Retains its beauty nearly twelve months of the year. Has a dense waxy-like pure white flower.

The leaves are deep green, edged the entire length with yellow.

Once established it should last forever. Do not fail to include this for your hardy Perennial Garden. If you wish, it can be taken up and used in a pot for indoor house use during the winter.

Each 75c; 3 for \$2.10. Postpaid.

Your Variegated Yucca is indeed a marvelous plant. It retains its beauty fully ten months of the year. Winter appearance is equally as beautiful as the summer-flowering. It is unexcelled for the landscape. Nothing could be more stately or imposing.

—R. A. Hacker, Painesville, Ohio.

SCUGOG

The Biggest of All Strawberries

6½ Inches in Circumference

See Opposite Page for Illustration

12055 Again we offer our customers something supremely good. A Strawberry of unusual merit. A berry that can be grown in the sunny south or the frozen norths of Canada. A berry that is the greatest of all for market or home garden. A berry that vastly exceeds in average size any other berry we know of. In its second year's growth it reaches 6¼ inches in girth; under special cultivation, 6½ inches and larger.

The first year it fruits smaller and of a bright red color. The second year the color runs from a bright red to a rich purplish red, so bright in fact it looks as if it was varnished.

It is the most attractive berry that we know of. Should bring on the market 5c more per box than any other Strawberry.

It is above the average in flower.

Has that rich good Strawberry flavor so highly appreciated in Strawberries. Sparsely seeded. Foliage beautiful green. Very vigorous and stands up well.

Medium early. **Doz.**

See Opposite Page for

16910 As its name Magnifica indicates, it is magnificent. No other flower in cultivation blooms as freely all the year round as this glorious plant. It is a mass of bloom day in and day out the entire year. It is full of bloom all the time. How a plant can support such a wealth of flowers day after day, week after week, month after month, is a mystery. One of the easiest outdoor or pot and window plants to grow that it is possible to find. It flowers from the time the plant leaves the cutting bed, no matter how small. It is, also in fact, the best, and almost the only blue-flowering winter plant. Is of easy culture and continues flowering. **Each 40c; 3 for \$1.00. Postpaid.**

The Streptosolen Anabilis Magnifica purchased from you is doing wonderfully and we don't have to plant it in any pot here in San Diego. One plant in full flower, all the time covers an area of four square feet. This will mean some more orders for you from some of our friends, no doubt, as everyone who sees it is wild about it.—C. F. Disbrow, Public Accountant, San Diego, Cal. Your Streptosolen is a marvelous plant.—E. C. Vick, New York American Garden Editor.

Childs' Seeds Top the World

CHILDS' FLOWERS GROWING AT SKAGWAY, ALASKA

Your Long Island Seeds, Bulbs and Plants certainly have the constitutional vigor you claim for them. I'm living here "On Top of the World" growing them with success and profit.—Chas. O. Walker, Skagway, Alaska.

A few convincing facts about Childs' Long Island Grown Products.

Probably as a class, Cabbage and Onion Plants are about the tenderest vegetation grown. However, during recent years these tender plants are grown to resist frost as low as 20 degrees above zero. This is accomplished by growing them alongside of the Atlantic Ocean where the salt sediment settles upon and hardens them. **No other method or no special seed is used.**

To these same Atmospheric Conditions on Long Island is directly traceable the superiority of Everything Grown by Childs'. Long Island projects out into the ocean like a long darning needle permitting the salt ocean winds, salt mists, salt fogs and heavy salt humidity to sweep the Childs' Farms and Greenhouses on the North, South and East, thus you have the reason for the strong constitutional vigor, exceptional hardiness and unusual productiveness of Childs' Plants, Shrubs, Bulbs, etc.

We are the only Seedsmen in the World located right out in the ocean, as it were. If there is any question or doubt about the superiority of our products, try them out, convince yourself. Grow them alongside of others grown anywhere else in America.

Jane Teller Mansion LOCUST VALLEY, NEW YORK

John Lewis Childs' Seed Co.,
Floral Park, New York.

August 5, 1926.

Gentlemen:

In your catalog last year you laid considerable emphasis upon the superiority of Long Island Grown Seeds, Plants, Roots, Shrubs, and Bulbs.

All you claimed seemed so eminently true I confess I was considerably impressed with its logic. As I had a large area to plant I decided to give your house an impartial test and gave you an order for part of my requirements, amounting to \$227.80 for 39 varieties of flowers and vegetables.

When delivered I confess I was elated over their appearance. Not a plant failed to grow. Alongside of plants bought elsewhere yours almost without exception have shown a superior vigor; that was immediately noticeable; that has been more than apparent throughout the season and amply substantiated in the profusion of bloom and foliage.

It may please you to know I am now a confirmed Childs' Enthusiast and that henceforth, I expect to be a Childs' supporter and that this next spring I hope to order twice as much.

Respectfully Yours,

Jane Teller.

\$1.25 Postpaid Childs' Surprise Collection \$1.25 Postpaid

Contains About Four Dollars' Worth of Seeds, Plants and Bulbs

We are obliged to grow enormous stocks of all kinds of Seeds, Plants and Bulbs to make sure of having enough. It is our custom after the heavy Spring business is over, in the latter part of May, to take this surplus stock of good things, make it into "Surprise" Collections, and offer them to our customers, giving them about four times the Catalogue value. The "Surprise" is the great variety of fine things and will be entirely of our own selection.

I guess I'm about one of your oldest customers. I started with you when you first started and I'm still with you. Your collection of Flower Seed is so good.—Mrs. Lola E. Ham, Auburn, Maine.

I'm so pleased with my collection. Pleasant memories will always be associated with your firm.—Albert Insley, Swarthmore, Pa.

Two strangers came to my door and asked where I got my beautiful flowers and asked me to write to you to put their names on your list. My Surprise Collection has surprised everybody.—Mrs. V. A. McIntosh, Henryetta, Okla.

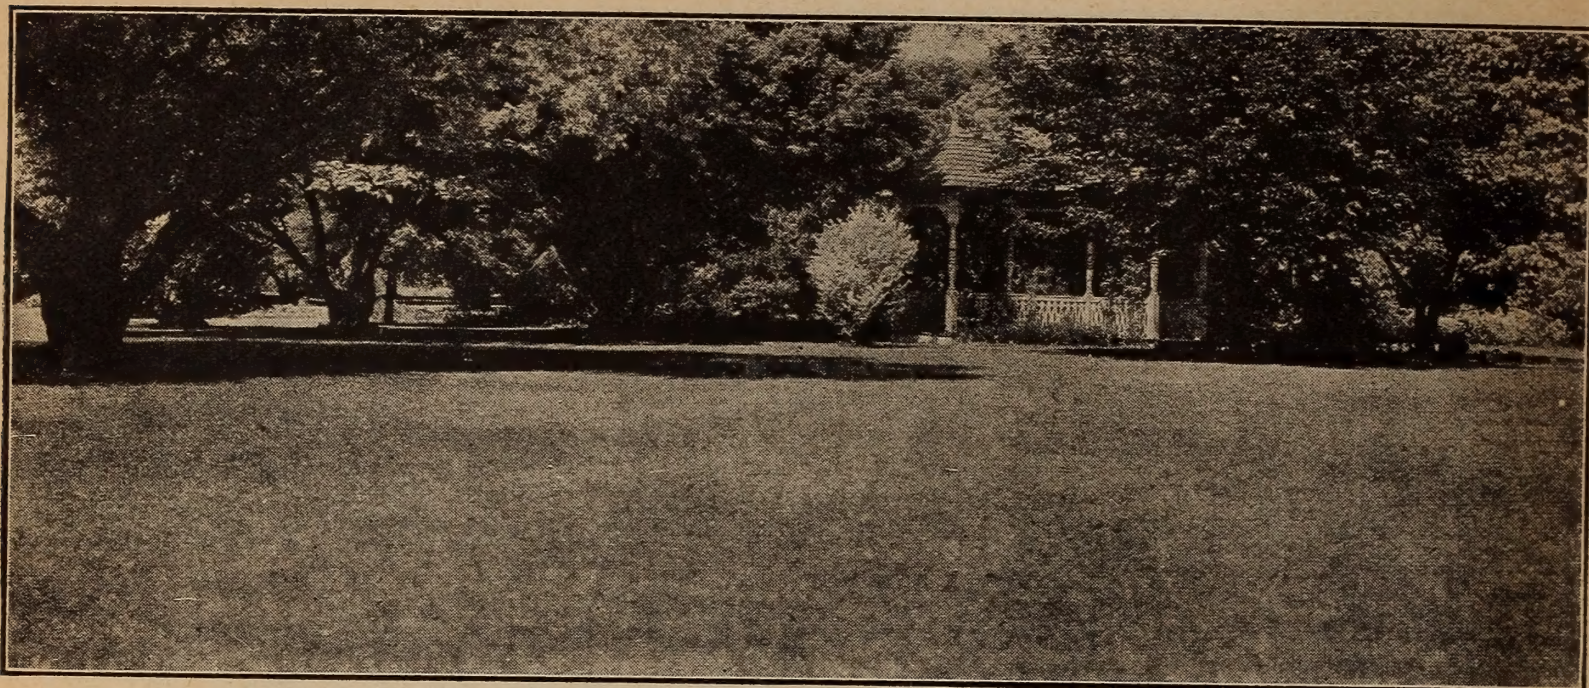

I received my Surprise Collection and was amazed and delighted with the fine plants, bulbs and seeds.—Louis F. Schwartz, Kitchener, Ont.

I appreciate the excellent goods and liberal service that has made Childs' Surprise Collection so much a pleasure.—C. W. Valencourt, 1614 Fondulac, Milwaukee.

I wrote you this morning complaining. How different this afternoon? I do not know how to thank you enough for the wonderful Surprise Collection. Certainly arrived in fine shape.—Anna Ryan, 1792 Parker, Detroit, Michigan.

Always Buy Lawn Seed to Suit Your Soil

Grounds surrounding our Offices and Warehouse Buildings

If you are making a New Lawn or renovating the old, by all means buy seed suitable to the character of your soil. For 52 years Lawns have been a study with us, we know from soil conditions the Grasses required for best results.

If you are unable to decide the type of seed required from the mixtures listed below, write us a full description, send your remittance and we will be glad to forward a specially prepared mixture to suit your needs.

DIRECTIONS FOR MAKING A LAWN SENT WITH EVERY ORDER

Every lawn reflects the character of the Home Owner. Every lawn depicts his ideals of a home. Lawns are the show windows of your pride in your neighborhood. Yet one of the most tragic things of life is the struggle so many make to get a nice lawn—usually the struggle of an ill advised purchase of the "Corner Grocery" type of lawn seed.

Good lawns of the velvety, smooth, emerald green type cannot be secured from light chafy seed, but only from a carefully blended scientifically balanced mixture of heavy full of life seed. Lawn Grass has been a life study with us. We know which are best for greatest results, regardless of weather conditions—be it wet, dry, warm or cold. Around us are the most wonderful homes in America. It is here people who know—depend upon the Floral Park Lawn Mixtures. If we give results to the most critical—surely our seed is best for you.

Floral Park Lawn Seed Mixtures

A careful, scientific blending of grasses that long years of study and experiments demonstrate will flourish under varied soil conditions; in adverse weather, and give from earliest spring until latest fall—a luxuriant, rich green velvety mat.

Humus For Lawns

Positively the finest Humus in America, bar none. Clean, odorless and free from weed seeds. Nothing equals Humus as a top dressing for lawns or to improve the soil where grass does not grow well. It is splendid to sweeten the soil in shady places and under shrubbery. Scatter it thickly over the lawn in fall or spring. In places where grass does not do well and on bare spots in the lawn, loosen the top soil and work in plenty of Humus before sowing the grass seed. Mixed with the soil for house plants, will increase the growth of the plant and the size of the blossoms. Nothing better for holding moisture and fertilizer in the lawn. Humus is clean decayed vegetable matter ripened and cured by the elements (odorless). Prices F. O. B. Childs' Great Color Harmony Chart Reveals the Secrets of Beautiful Garden

Another Great Achievement Every Lover of Flowers Should Have It

No one thing in our career of 52 long years has done more to emphasize our ability, our efforts, our experience and knowledge of plant life, our standing as Horticulturists—than the introducing of our Color Harmony Chart. Recognized everywhere for the proper grouping of flowers in the garden.

Every person growing six or more flowers should have and use this chart, in order to make the colors harmonize.

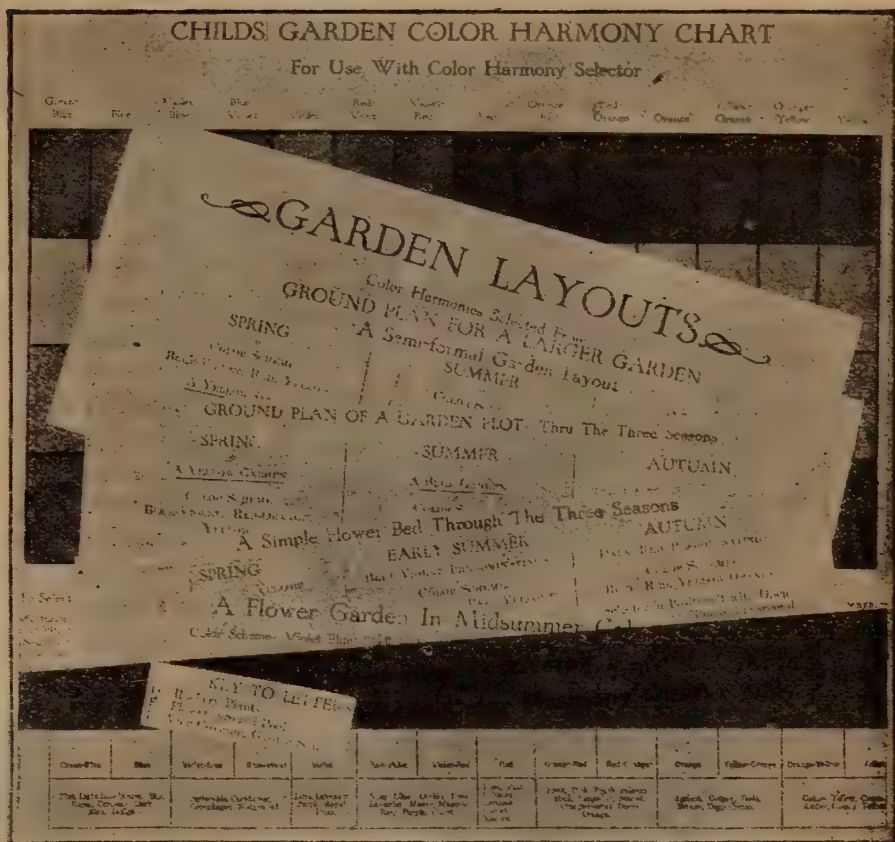

What It Is. It is the most complete, most exhaustive, most comprehensive, most scientifically worked out scheme of flower colors ever prepared; representing years of study and toil. Comprises 56 different colors. So simple that a ten-year-old child can operate it. Will last a lifetime. Should be in every home library also. It enables you (after you have once decided upon any one color you want) to select all the other flowers in their proper colors so they will harmonize perfectly. A chart of colors, representing every flower. A selector for locating the colors. Sketches of color grouping. Sketches of landscaping. Sketches of garden arrangements. A list of names of practically every known flower. A list of colors of practically every known color. Harmony alone makes the flower garden effective, restful and beautiful. **Price \$1.00 Postpaid.**

I am so well pleased with the Color Harmony Chart that I've been asked to order three to the enclosed addresses.—Mrs. Sarah E. Deeter, Harrisburg, Pa.

The Color Harmony Chart received. The examination I have given it seems to show it will be exceedingly valuable.—V. H. Ries, Assistant Professor Purdue University, Lafayette, Ind.

Permit us to state this chart is used in almost every State University in America, also officially recognized by the American Gladiolus Society.

A New Red Leaved Barberry Cheers the Dreary Fall

We offer this year for the first time this New Red Leaved Barberry. It is one of the finest and most meritorious novelties of the present generation.

In all respects it resembles the well known green leaved Barberry so popular for years except that the leaves are fully as red as its berries. The leaves are a rich lustrous, wholesome, healthy bronzy-red. The color does not fade as the season advances, but instead, it takes on a brighter vivid orange, scarlet and red shades of unusual brilliancy.

14016 Two year old. Each \$1.00; doz. \$10.00; 100 for \$75.00.

Delphiniums (*The Newest— The Best—The Largest*)

52180 Childs' Private Estate Hybrids. Unquestionably the finest strain of all Delphiniums, regardless of any claims to the contrary. A distinct selection of our own. Seed is grown on our own farms. It is something radically distinct, something supremely better, something entirely different from other strains.

It is a generally accepted idea that Delphiniums in formation are alike—not so with this strain—they are different in shape, carried differently on the spike, colors and centers are different from any other Delphinium.

Plants are strong and vigorous. Produce long, strong flower spikes up to 5 feet tall. Bloom in profusion all season. Your garden will be the most admired in the neighborhood if you grow this strain. The rich blue colors excel any other Delphinium. **Seed per pkt. 50c; 1/4 oz. \$1.25. Postpaid.**

It is so vastly improved in every way that it resembles a new creation. Even the color tones are embellished to the most delightful hues.

There can be no more improving or fascinating sight than these tall, stately Columbines as they shove their exquisite heads up ablaze in their dazzling color. This is a true native flower, hence does well in any soil.

It is easy to cultivate and pays handsome and generous returns to all who grow it. A profuse bloomer, strong, hardy, vigorous and of immense size, in colors of cream, pink, lavender, blue, white and red. We offer but one quality: Childs' Special Strain. The Sweet Scented Syringa Virginale

Our Own Original Introduction Storm King Fuchsia Much Improved

15920 Improved Storm King. This is a Childs' introduction. Selling as many as 200,000 in one season. Unquestionably the most popular flowering plant we catalog. It is rich in the greenness of its foliage. The graceful pendant-shaped flowers of unique, fascinating but beautiful form, in its beautiful coloring, make it a plant that is much admired.

A double white, perpetual blooming weeping Fuchsia. Its graceful, weeping habit, and beautiful flowers are more freely borne than those of any other sort, making the most valuable of Fuchsias. It is always in bloom. The branches droop most gracefully and the blossoms are very large.

The buds, for two weeks before they expand, are balls of glowing scarlet-crimson. When expanded the enormous double flowers are almost pure white, capped by a calyx of glowing scarlet.

15920 PLANTS. Each 50c; 3 for \$1.25. Postpaid.

Just the finest—the best Fuchsia I ever saw, says J. R. Wheeler, Glenwood City, Wis.

The Charming Double Begonia Vernon Hybrid

(See illustration.) The Begonia has always been a "Mother's" plant. For outdoor summer use or indoor winter use we commend this to every "Mother Everywhere" as the one Begonia that will produce more profusion of double flowers than any other Begonia or any other kind of plant. Especially recommended for outdoor use. In any location it is always a remarkable bloomer. The foliage is beautiful and the flowers range in white, pink and crimson colors. It is decidedly an all-year-round flower. Begonias have always been a specialty with us and we have introduced more varieties, grow and sell more different varieties than any house in America. Childs' is noted the world over as "The Begonia House."

**AZALEA AMOENA
Superba**

Azalea Amoena Superba Most Beautiful Hardy Shrub in the World

Did you ever drive along New York highways and see bushes literally covered with rose shaped flowers, so thick in fact you couldn't see the leaves on the bushes, well this is that wonderfully prolific shrub. They start to bloom their heads off the first year and each year as they increase in size the profusion of blooms increases. Always when in bloom it is a fascinating, dazzling display of color and flowers. It is of intense deep rich crimson. Protect the first couple of winters by covering with leaves or stable manure.

14010 PLANTS. Each 75c; doz. \$7.50. Postpaid.

From my small Azalea I now have an immense bush. Me for your Long Island shrubs.—Perry Moore, New Brunswick, N. J.

Oh I'm so happy over my Azaleas, purchased last spring. All my life I have wanted some and never knew where to get them.—John Bailey, Bronx, New York.

Wish Moses could see my Fountain Cyperus. I think it would make those he hid in look sick. Mine are ten feet high. Why, Mr. Childs, they're the most marvelous thing I ever had in my yard.—Mrs. John Carr, Midland, Maryland.

Fountain Cyperus—Unexcelled for Beautifying the Lawn

Look at the illustration on the right then imagine it in your yard six to eight feet tall. Can you conceive of anything more beautiful, more attractive? The graceful triangular stems spread out into a beautiful plant with great heads of thread-like green leaves that sway back and forth in the smallest breeze, giving it an effect like a playing water fountain (hence its name). In the north, place in a large pot or tub and store during the winter. In the south, it may be left in the open all winter. There is no more admirable and interesting plant for the lawn or garden than this odd plant.

We first introduced this five years ago and it has grown in popularity with amazing rapidity. Thrives in wet, damp, moist and dry places.

**PHOENIX
ROBELINI.**

Phoenix Robelini Palm for House Use

Not something new, but a palm for house use that will stand considerable abuse and still grow rapidly and large. It is beyond a doubt one of the finest palms possible to grow. Nothing can surpass it as a decorative plant. It will succeed in any window. If moved outdoors in summer does equally well. The foliage is graceful, striking and beautiful. We question if this variety can be purchased anywhere else. We offer it because we have been studying the best palms for growing in the home and find that this and our Filifera are unquestionably the best for average home conditions.

Childs' World Renowned Flower Seeds

This Garden grown from our Color Harmony Collection No. 45

Grown from a Color Harmony Flower Seed Collection

When we offer you Childs' Flower Seeds we have aside from quality in its keenest sense, seeds of a definite type—viz: Seeds grown for strong constitutional vigor, hardiness, productiveness and general adaptability.

TWO RULES TO SUCCESS. Sow flower seeds just below the surface, never deeper than three times their depth. Pinch off the tops of the young plants to make them bushy or branch out and bloom freely.

Annuals. These head the list for general use on account of their habit of blooming and reaching their full growth in the same season as sown. According to class they are used in every conceivable location.

Perennials. We recommend the sowing of Perennial seed in the spring. Perennials are valued for their habit of growing and blooming year after year without resowing. They produce the earliest blooming and are usually the last in flower before freeze up.

Childs' Great 60 Day Makegood Sweet Corn

Childs' Golden 60 Day

The Marvelous Extra Early

See Color Illustration Page 85

760 This Corn of our own introduction has reached such national importance that it is fast being recognized in all big city markets as the leading Extra Early Variety. It is safe to say when gardeners tie up to a variety for earliness that it is a good type for the home grower.

It is beyond a shadow of a doubt the earliest of any Sweet Corn. It is on the market a full week to ten days before Golden Bantam. It is an exceedingly sweet variety. Has a very desirable plump shape. Pearly white in color (if you prefer a yellow strain try this same variety in our Golden 60 Day), plump, fat, luscious, prolific. Kernels fairly high; usually bearing two ears. Many have three ears on. It does not sucker. See color illustration, Page 85.

Pkt. 15c; 1/2 lb. 30c; lb. 50c; 2 lbs. 90c. Postpaid. 5 lbs. \$2.00; 10 lbs. \$3.75; 25 lbs. \$7.00. Not postpaid.

Childs' Golden 60 Day Extra Early Sweet Corn

765 This variety is identical to our famous white variety 60 Day Makegood except it is a rich golden yellow in color.

We regret our inability to supply the orders received late last season. However, we have grown ample stocks and expect to take care of all orders this year. It's a grand variety. A Sweet Corn that will mature in favorable weather in 60 days and in unfavorable ahead of any other variety grown in the same district. Orders should be placed early. For full description see above variety (except color). See illustration opposite.

Pkt. 20c; 1/2 lb. 35c; lb. 60c; 2 lbs. \$1.00. Postpaid. 5 lbs. \$2.25; 10 lbs. \$4.25; 25 lbs. \$9.75. Not postpaid.

Remarks From Our Patrons

My gardener says 60 Day Sweet Corn July 4th.—Mrs. Chas. V. Edmonds, Clarindo, Iowa.

We motored to Detroit and were surprised to find that they had Sweet Corn, while ours at home was two weeks from ripening. My daughter said it was your famous 60 Day Makegood. Planted at the same time it was two weeks earlier than my daughter's Golden Bantam. She had the finest garden in the district, all from your Long Island Seeds.—Mrs. Henry S. Dieroff, 333 Grant St., Wilkes-Barre, Pa.

Let me tell you of your remarkable 60 Day Makegood Sweet Corn. I planted it Good Friday and I think every kernel grew. When one foot high a big snowstorm covered it up. After the snow it seemed better than ever until May 24th we had a heavy freeze. The corn turned black almost to the root. Warm weather came quickly and the corn with renewed vigor gave us delicious, luscious sweet corn on the last day of June. I have been a customer of yours for 40 years.

Mrs. Annie Arnold, 115 Miss. Blvd., Bettendorf, Iowa.

Childs' Overnite or Leafless Radish

1675 See page 77 also. We call it Overnite on account of its ability to produce a radish so rapidly, usually less than two weeks. We call it leafless because it seldom if ever has more than two small leaves on it.

Unquestionably the earliest radish grown. Certainly by far the most tender, coolest, crispest and best flavored. Pkt. 15c; oz. 25c; 1/4 lb. 65c; lb. \$1.75. Postpaid.

Childs' Golden Acre Extra Early Cabbage

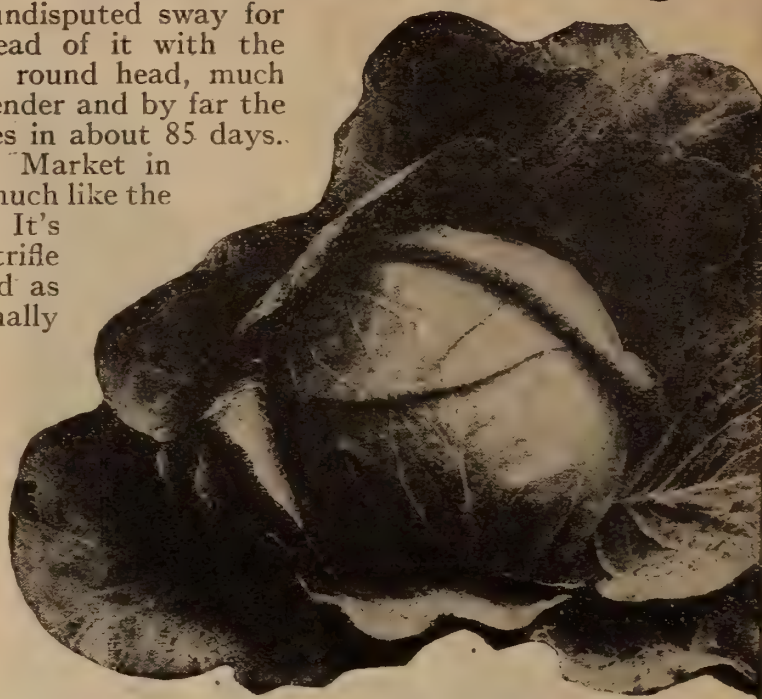

510 Extra Jersey Wakefield has long held undisputed sway for earliness. However, this is about five days ahead of it with the added advantage of being a larger yielder, a round head, much sweeter, better flavor, more crisp, equally as tender and by far the most solid in head of any cabbage. It matures in about 85 days. It is identical to the celebrated Copenhagen Market in every way except one—it's earlier. It looks so much like the Copenhagen you can't distinguish them apart. It's the earliest cabbage grown. The head is a trifle smaller than Copenhagen. Heads are as solid as lead and will not burst. The texture is exceptionally fine. The quality superb. Leaves are light in color, tightly folded. Stem short. Ripens more uniformly than any cabbage. **Pkt. 20c; 1/2 oz. 40c; 1/4 lb. \$1.75; lb. \$5.00. Postpaid.**

My Golden Acre Cabbage averaged 10 lbs. to the head.—Mrs. Chas. Edmonds, Clarindo, Iowa.

Byers' Stringless Greenpodded Bean

180 This stands unchallenged as the most meritorious of all the Greenpodded Bush Beans. It is the acknowledged premier Snap-bean. It out-ranks any other Greenpodded Bean. It is stringless, luscious and exceedingly tender. It is one of the biggest of yielders. Its season is longer.

Plants of healthy, vigorous growth, very branching and productive. The pods are five to six inches long, round, nearly straight, green in color, very brittle and fine quality. The plants are very productive and have a long season of bearing. It is a valuable sort for the home garden or market. This shows the Byer is more than twice as productive as the best of the other varieties.

Pkt. 15c; lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00. Postpaid. 10 lbs. or more 35c per lb. Not Postpaid.

I'm so pleased with your Byers' Bean. It is truly a remarkable high quality Bean.—M. M. Bitting, Mitchellville, Md.

Childs' Extra Early Coreless Carrot

585 A carrot that can be eaten raw with almost as much relish as an apple, is what we can righteously claim of this wonderful strain. Although it is an extra early variety it can, on account of its coreless nature, be used long, long before maturity with the added advantage of having a tender, delicious coreless carrot away into the following early spring months, by winter storing.

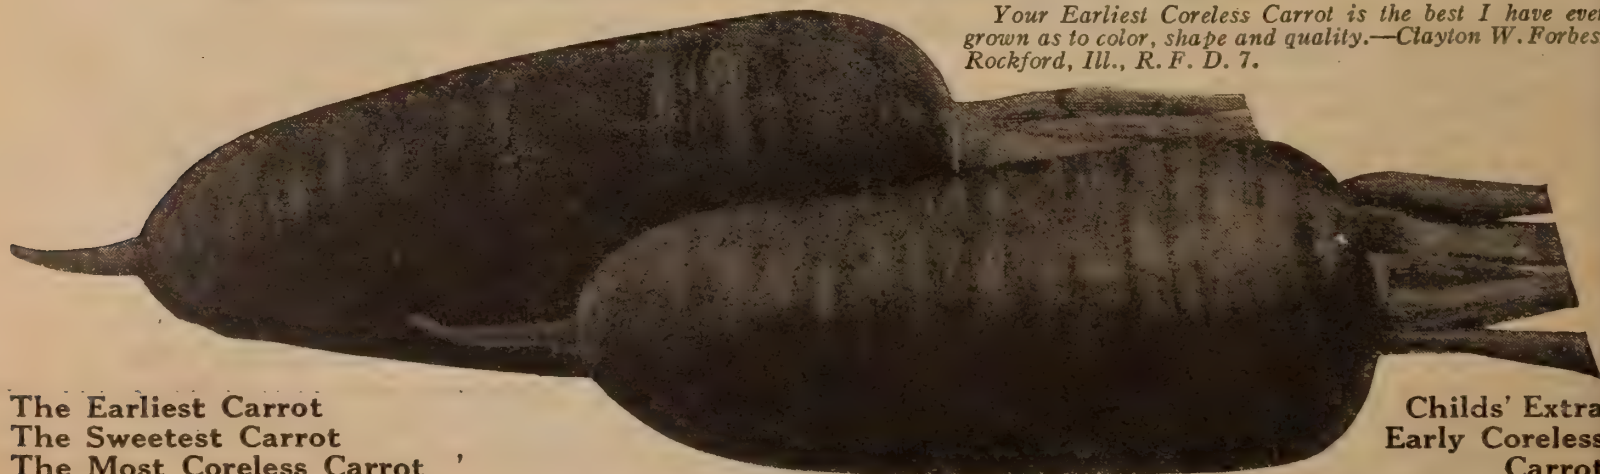

It is the sweetest and best flavored carrot we know of. It has the finest grain and texture of any strain. The flesh is much firmer than any other sort. It does not discolor like other varieties. Its color is richer and more appetizing than any of its family. It is the best for forcing. The best for early market trade. The best for the home garden for early use. Matures fully two weeks earlier than the next earliest carrot. Measures six to seven inches in length. Blunt at both ends. It is the ideal shape for carrot. Skin is smooth. Small tops. Short tap roots. The orange red color is deeper than is any other sort. If you want something delicious start gathering these carrots when very young and keep on using them regardless of size. **Pkt. 15c; oz. 35c; 1/4 lb. \$1.00; lb. \$2.75. Postpaid.**

Our Great New 60 Day Cauliflower

A Full Month Earlier Than Any Other Cauliflower. The Coming Money Maker for Market Growers

565 We introduce this remarkable Cauliflower this year for the first time. In our opinion it is destined to revolutionize Cauliflower growing as it is a full month or more earlier than any variety we know of.

The heads are large, solid and snow white. No inter growth head growth. Just a clear white-as-snow head. Matures in 60 days from plants. Its rapid growth seems to have perfected its quality.

We prefer our customers try it out themselves. It is still primarily in its experimental stage, therefore only offer it in small quantities. Many who have tried it substantiate our claim for quality and earliness. Market Growers everywhere should try a small plot of this Cauliflower for early market use. We believe it will prove a big money maker. Read what we have to say on page 63.

Pkt. 50c; $\frac{1}{8}$ oz. \$3.00; $\frac{1}{4}$ oz. \$5.50. Post-paid.

I have 24 heads of your 60 Day Cauliflower growing and although about seventy days in maturing I'm sure under favorable weather conditions it will mature in 60 days from plants.—P. Graff, Queens Village, N. Y.

Your 60 Day Cauliflower is certainly the earliest thing in Cauliflower I ever set eyes on.—J. Rutherford Wheeler, East Hempstead, N. Y.

Your Sixty Day Cauliflower is the earliest of any Cauliflower I ever had and such firm heads as white as snow.—A. Mitchell (Market Grower), Longmeadow, Mass.

I've tried many strains of Cauliflowers but your 60 Day is a month earlier and equal in quality to the best snowball.—Alex Vollkomer, Franklin Square, New York.

Early 60 Day

Childs' Earliest Cucumber The Earliest of All

825 Cucumbers differ from most other vegetables in that they are, as a rule, always served raw. Therefore a really worth-while variety must of necessity be tender and crisp. Next comes earliness. In Childs' Earliest we

have an extremely early variety, tender, crisp, cool and finest flavor. It is a variety of vigorous growth that fruits early, maturing in about fifty days. It produces in abundance a fine shaped fruit about seven inches in length. It is uniform in size, very straight with a slight indication of pointedness, dark green in color and clear white flesh, that is unusually tender, crisp and finely flavored.

It is one of the best for slicing, salads and pickles. It retains its color for prolonged periods after ripening, an especially valuable attribute. Its habit of fruiting early permits of early picking and prolongs its period of usefulness. Pkt. 15c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb., \$1.75. Postpaid.

Childs' Famous Pineapple Onion

1371 Here's an onion of unusual merit, unusual shape and unusual flavor. Here's an onion that leaves no repulsive onion "after-effects." An onion that is decidedly distinct in every way from any other onion. Shaped like a bottle and slightly flavored like a Pineapple.

It is an ideal onion for the home kitchen and general table use. It is just as easy to grow as any onion and certainly more desirable. It has a superb flavor that cannot be equaled by any other onion. It has a delicate flavor, a delicious flavor beyond compare. It is rich, tender and crisp. For mildness it surpasses by far the sweet Spanish onion. Pkt. 15c; oz. \$1.15; $\frac{1}{4}$ lb. \$3.35; lb. \$10.00.

Located as we are, right in the very heart of the biggest vegetable growing district in the world—with 52 years of experience and study, we believe we are fully qualified to know the vegetables best suited for every garden, hence any vegetables offered by us can be chosen with the knowledge that you are getting absolutely the best variety for either the home garden or market. No one, anywhere, can supply you better seed.

How to Prolong Your Vegetable Season

Quite a number of the vegetables which we offer lend themselves just as readily to fall cultivating as to spring growing. Lettuce, for instance, varieties which will not stand American midsummer heat is an ideal fall crop. The same may be said of Spinach, Radishes, Turnips and Beets. You should grow more root crops—Beets, Carrots, Kohlrabi, Celeriac, Parsnips and Turnips. With the exception of Parsnips, all these may be sown as late as August 1st in the latitude of New York and will produce crops suitable for storage in sand or soil in the cellar for your vitamine bearing food during the winter months. Planting directions on every packet.

Asparagus Roots

First dig a trench about 2½ feet deep, fill in with 6 inches of well rotted stable manure, cover with 4 inches of rich soil. Be sure that the roots are carefully spread out. Cover this with three inches of soil. As the Asparagus grows, keep filling in a little soil at a time until you have the bed level. It will take a year before you have filled in your trench. Rows should be 3 to 4 feet apart. Root 1 foot apart in the row.

Melting Delicious Bush Lima Beans

How to Grow Limas. Lima Beans should not be planted before the soil has warmed up and the weather quite settled. Place the eye down, about 5 inches apart in rows $2\frac{1}{2}$ feet apart and cover with 1 inch of soil. One pound of the seed will sow a row 100 feet long; $\frac{3}{4}$ bushel will plant 1 acre.

300 Fordhook Bush Lima. (See illustration.) Many years of study and experiments have enabled us to markedly improve this wonderful variety.

There can be no conflicting of opinions as regards which is the best variety, as it is universally agreed this is the best. It has so many virtues any one of which would in itself be a prime attribute for commendation, viz.: It has an ever-bearing habit of growth that permits it to bear all season. It is extremely early. It bears until late frost. The pods are immense in size. It is exceptionally prolific. Is of finest flavor. Is big, fat and juicy. Vines frequently bear half a hundred pods at one time. The pods are long, wide and thick. Plants are $2\frac{1}{2}$ feet across. Usually bears in clusters of 4 to 8 pods. It is the most popular of the Limas. The best for the Commercial grower. The best for the home grower and by far the one best suited to the amateur. **Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 55c; 2 lbs. \$1.00. Postpaid.** By express at purchaser's expense, 10 lbs. or more, per lb. 40c.

310 Burpee Improved Bush Lima. This is a very superior form of Bush Lima, bearing the largest pods in greater quantities than any other Dwarf sorts. Pods measure from 5 to 6 inches long, and are $1\frac{1}{2}$ inches wide, containing fine large Lima Beans, of a luscious flavor. They mature within about 90 days from date of sowing. You will be greatly pleased with this excellent Lima. **Pkt. 10c; $\frac{1}{2}$ lb. 30c; 1 lb. 50c; 2 lbs. 90c. Postpaid.** By express at purchaser's expense, 10 lbs. or more, per lb. 35c.

320 Henderson Improved Bush Lima. This variety belongs to the class of small Lima, which is very excellent. In the South it is sometimes called "Butter Bean." On account of their hardiness they are ideal for growing in the North, where they will mature early, and produce a splendid crop. Flavor is very delicious and sweet, and they yield a tremendous crop. We have an excellent stock of this variety. **Pkt. 10c; $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 2 lbs. 70c; 5 lbs. \$1.50. Postpaid.** By express at purchaser's expense, 10 lbs. or more, per lb. 25c.

Giant Podded Pole Lima is one of the finest flavored of all limas

Pole Varieties of Lima Beans

330 Giant Podded Pole Lima. (See illustration.) This is really a remarkable Lima from its point of productiveness. The vigorous growing vines grow with extraordinary rapidity to 10 or 12 feet in height, throwing out in its various stages of growth 10 to 15 laterals, each producing immense quantities of pods. The first roots produce a crop and then on in succession as the new branches form, comes additional pods, thus giving succession crop on the same parent stem—or in other words it is an "Everbearing" variety.

Pods come in clusters of 4 to 8, measuring 7 to 8 inches long, $1\frac{1}{2}$ to 2 inches wide and thicker than any other Pole Lima. The flavor is delicious. It is tender, meaty, luscious and sweet. Matures in about 80 days. **Pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.00. Postpaid.** By express at purchaser's expense, 10 lbs. or more, 35c per lb.

Postpaid.** By express at purchaser's expense, 10 lbs. or more at 30c per lb.

Childs' Famous Stringless Beans

What is more delicious than fresh, brittle, stringless beans right from your own garden? Beans are among the comparatively few vegetables that will yield well in even poor soil, although, of course, greatest crops are gathered in moderately rich loam. They should not be planted until the soil is quite warm and all danger of night frosts is past. Never walk between the rows or attempt to cultivate them nor to gather the crop while the vines are wet. It will spread rust, and the leaf spot disease. Drop seeds 4 inches apart in the row and cover with from 2 to 3 inches of soil, leaving 2½ feet of space between the rows. One pound of seed will sow about 100 feet of row. For a constant supply for a family of five, sow 30 feet of row every other week from May 1st until July 1st.

Early Bountiful

Childs' Triple-Tested Pole Beans

Pole Beans are much heavier yielders than bush varieties. When properly staked up for vines to run up they require less room than the bush varieties. Hence, are largely used for small gardens, where the space is limited. Many claim the quality better.

Culture. Do not plant Pole Beans until the ground is warm, and the weather settled, after all danger of frost is past—about May 1st. Set poles about 4 feet apart each way and put 6 beans around each pole. We are offering here the very best varieties of Pole Beans. One pound will plant 200 hills.

Green Podded Pole Beans

230 Kentucky Wonder or Old Homestead. There is not a more dependable bean in existence, nor another bean that equals it year in and year out for sure large yields of unequalled quality. It isn't only a Kentucky Wonder, it's a National Wonder.

In quality it is par-excellence and is luscious, tender, brittle and stringless. We have in our own strain of this an Improved Type that is remarkable for its extra earliness, maturing in about 60 days. The pods are nearly 10 inches in length, round and somewhat curved. **Pkt. 10c; 1/2 lb. 25c; 1 lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75. Wax Pole Beans

260 Kentucky Wonder Wax. The same thing is true of this bean among the wax varieties as the Kentucky Wonder is among the green pods. It is a larger yielder and better quality than any other wax-podded sort. It would seem that nature intended to offset the trouble of training upon poles by providing a superior quality and greater yielder. We find the same condition applies to varieties of Tomatoes that have unusual climbing habits.

Has broad fleshy stringless pods that mature in about 70 days. **Pkt. 10c; 1/2 lb. 25c; 1 lb. 45c; 2 lbs. 80c; 5 lbs. \$1.75. Postpaid.** By express at customer's expense, 10 lbs. or more 30c per lb.

Swiss Chard, a great yielder of Spinach greens all summer

Chard (SWISS CHARD OR SPINACH BEET)

A Beet which forms no roots, but makes big tops. The mid-ribs of leaves may be boiled and served like Asparagus, while the green portion of each leaf makes delicious Spinach greens. A 15-foot row yields about all a family of five can use between July 1st and frost.

441 Lucullus. (See illustration.) This variety is so vastly superior to any of the other types that we have discontinued all but this. Every garden should have chard of this variety. Similar to Spinach in flavor, and many think it superior as a delicacy. Prepare for use similar to Spinach. The white stalks or mid-ribs are also cooked like Asparagus. The leaves of this strain are heavily crumpled, tender, delicious flavor. Can be cut through and seasoned. Grows 2 to 2 1/2 feet high. Does well in hot weather. It yields a constant crop from June to winter. Can be cut down to the ground, new shoots will then start again from the roots. Ready to use in about 60 days. **Pkt. 10c; oz. 20c; 1/4 lb. 45c; 1 lb. \$1.25. Postpaid.**

I want you to know I have never had such healthy tender Chard in my life as I had from your seed.—G. Nichols, Mt. Lake Park, Md.

Try Childs' Renowned Rajah Beet

While Beets may readily be grown in any kind of soil, they prefer a deep, rich loam, free from stones.

Seeds are sown as early in the spring as the ground can be properly prepared. Walking over the row after seeds are sown will press the soil in firm contact with the seeds and produce quicker germination.

Sow in rows 18 to 24 inches apart, and should be covered with about $\frac{1}{4}$ inch of soil. When about 4 inches tall, thin out to about 4 inches apart in the row, sow a 15-foot row every week from early in April until middle of July. One ounce is sufficient to sow about 60 feet of running row.

400 Rajah. King of Winter Beets. (See page 85 for color illustration and page 84 for additional description.) Color is a very dark blood red, and its tenderness and quality are the reason for its wonderful popularity. **Pkt. 15c; oz. 35c; $\frac{1}{4}$ lb. \$1.00; 1 lb. \$3.00. Postpaid.**

360 Childs' Early Wonder. (See illustration.)

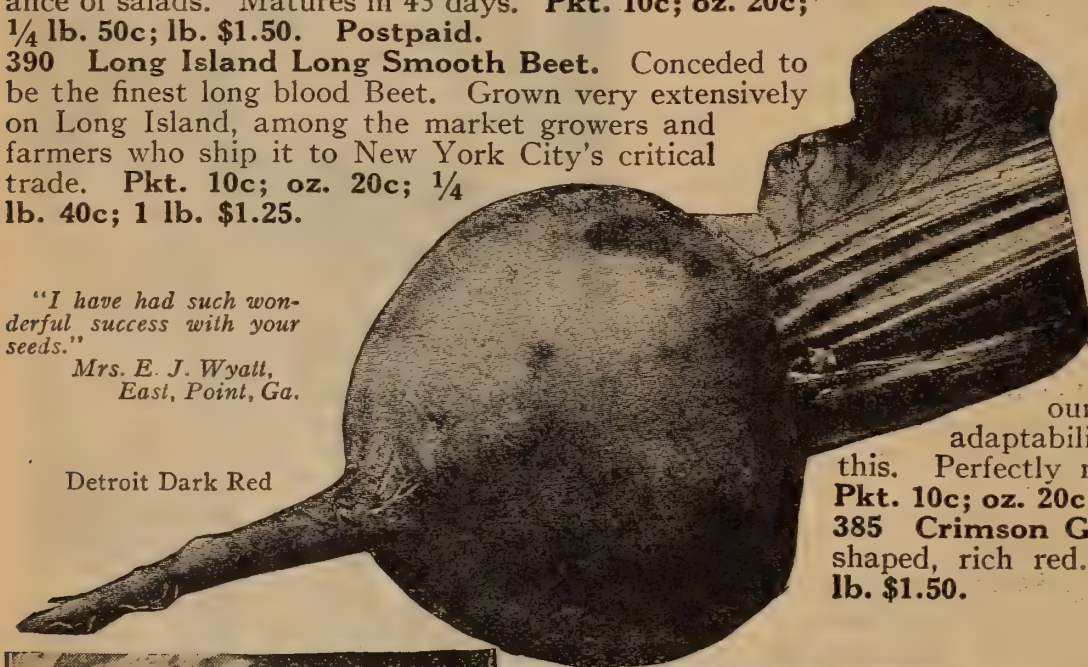

It is an extremely early beet, hence a desirable and profitable one for both home and market. It is the best for succession growing where young tender beets are wanted throughout the summer. It is of globe shape, coming probably more uniform in size and shape than any other beet grown. The skin is smooth and the flesh a deep blood red, singularly free from white zones. In fact in growing our seed every beet is notched for zone appearance and all white livered specimens discarded. It is an extremely tender and fine flavored beet. It retains its flavor during cooking better than other beets. It is unusually attractive sliced. It enhances the appearance of salads. Matures in 45 days. **Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50. Postpaid.**

390 Long Island Long Smooth Beet. Conceded to be the finest long blood Beet. Grown very extensively on Long Island, among the market growers and farmers who ship it to New York City's critical trade. **Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.25.**

Brussels Sprouts

It would be difficult to overrate the delightful, luscious sweet flavor of Brussels Sprouts, the most delicious of the cabbage family, and just as easy to grow. Just try one small row this year.

They are distinctively a late summer and fall vegetable and seeds should not be sown until late in May or early June, the same as late Cabbage. As soon as the plants make the second pair of leaves they should be transplanted in rows 2 feet apart, allowing 18 inches between the plants. The sprouts should not be used until after frost has improved their quality. One packet produces in the neighborhood of 200 fine strong sturdy plants.

Savoy Cabbage

Cauliflower Extraordinary

We question if there is a vegetable so universally relished and appetizing as the Cauliflower. Cauliflower seed is produced in the cold regions of Denmark and is an exceptionally hardy plant that cultivates, thrives and grows with comparative ease anywhere. If you use our seed, you should have no failures, but the finest white Cauliflower possible to grow. Try our short season vigorous Cauliflower seed.

For Early Cauliflower, sow indoors or in hot beds during January or February, transplanting 2 to 3 inches apart, when plants will permit, then transplant 2 1/2 feet each way in the open as soon as soil and weather will permit. Water freely, especially when heading. When heads form and are hard, tie the leaves over the head in order to blanch the head. Why not try a few heads of Cauliflower this year.

565 Childs' 60 Day Cauliflower. (See illustration on page 55.) Again we lead in our introductions, of things supremely good, by offering a brand new strain of Extra Early Cauliflower that comes very nearly maturing in half the time of some of the old reliable sorts.

This is a fine strain of Snow White Heading Cauliflower that here in this section matures in 60 days from time of setting out the plants. Other varieties take about 100 to 120 days.

We have not had seed enough prior to this season to offer it hence cannot state much about its success elsewhere. **Pkt. 50c; 1/8 oz. \$3.00; 1/4 oz. \$5.50. Postpaid.**

Extra Early Surecrop Cauliflower

Carrots With a Distinction

Carrots play a large part in our diet, served both raw and cooked. Carrots are good for the complexion. Young children are given carrots among the first vegetables they are allowed to eat. No vegetable is easier to digest. Serve plentiful and often.

To have carrots that are just right throughout the season, it is advisable to make repeated plantings. Put the rows 24 inches apart and as soon as the seedlings are 3 or 4 inches tall, they should be thinned out to stand 3 inches apart in the row.

585 Childs' Extra Early Coreless. (See page 54 for illustration and full description.) The greatest carrot in the world. The earliest carrot of all. It is utterly devoid of core. Rich orange color. Blunt at both ends. Pkt. 15c; oz. 35c; 1/4 lb. \$1.00; lb. \$2.75. Postpaid.

590 Chantenay, or Half Long Model. (See illustration.) This is one of the very choicest for the home garden. It has a very delicate flavor, comparatively small tops, and ready within 60 days from date seeds are sown. If you are choosing one carrot only, take this one. You can't go wrong with it. Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.20. Postpaid.

600 Denver's Half Long. It is generally pretty well conceded that this is the most popular of all carrots. It is a large cropper. A dependable cropper and matures in about 80 days. It is a small, handsome orange-red carrot, and for main crop has no equal. It is excellent in shape, growing from 6 to 8 inches long, averaging 2 1/2 inches in diameter. It is a cylinder shape, tapering to a blunt end. Pkt. 10c; oz. 20c; 1/4 lb. 45c; lb. \$1.00. Postpaid.

610 Early Scarlet Horn. This is an extremely early variety, that produces fair sized carrots within 40 days after seeds are sown, and should be used as soon as it grows to about 3 inches long. Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. \$1.20. Postpaid.

Something about your Carrot seed make them grow and produce better than seed I purchased elsewhere.—M. J. Whaley, 520 W. 230th Street, New York City.

I have traded with you for many years and always my results have been wonderful.—Mrs. Ettie Anderson, 802 E. A St., Ontario, Calif.

Send me your catalog for I certainly need good seeds here.—Mrs. Ida M. Welch, Waynesfield, Ohio.

Chantenay

620 Ox Heart. This is an excellent carrot very free from hard cores or fibre, and of very excellent quality. Grows rather wide and stocky, measuring 3 to 4 inches in length, and stump-rooted. On account of its thickness it frequently reaches 2 lbs. in weight and consequently is much used by farmers for stock feeding purposes. It is a deep orange in color. The flesh is very tender and sweet. Pkt. 10c; oz. 20c; 1/4 lb. 35c; lb. \$1.20. Postpaid.

630 Improved Long Orange. (See illustration.) This is the long carrot that grows rather rapidly, gradually tapering in shape, but is free from small rootlets. It is a good keeper and excellent for winter use. Very handsome, straight, smooth roots of bright orange color, frequently 12 inches long and 3 inches in diameter at the neck. No better carrot for all round table use or field culture. Very productive. Fine flavored. Tender and sweet, good from end to end. Pkt. 10c; oz. 15c; 1/4 lb. 40c; lb. \$1.00. Postpaid.

We have come to realize that by using your seeds we save much time and make much more money.—Chas. A. Newton, Harrisburg, Mich.

Stock Carrots

These are the carrots that are good keepers, and grow to rather a large size and are excellent for winter feeding for stock. They are heavy yielders and seed should be sown in May and June. If sown in drills, 4 lbs. of seed will be sufficient for an acre. Nothing better for increasing the flow of milk in cows. For cattle, hogs and horses they are unexcelled.

640 Improved Short White. This is the standard of this type of carrot and is very popular. Roots grow about 8 to 10 inches long measuring 3 inches across, tops gradually tapering. It is a good keeper and has excellent food value. Much the easiest to harvest. Pkt. 10c; oz. 15c; 1/4 lb. 25c; lb. 75c. Postpaid.

Chicory

Unexcelled for Greens or Salads

Witloof Chicory is grown for its roots which produce an appetizing pinkish salad. One ounce of seeds will produce about 300 roots. Sow in May in rows 2 1/2 feet apart and cover with 1/4 inch of soil, 4 inches apart in the row.

700 Witloof or French Endive. In October when the roots are fully developed, they should be dug and the leaves cut off to within 1 1/2 inches of the crown. The ends of the roots should be cut so that you have roots averaging 8 inches long. After keeping them out of the ground for about 2 weeks, replant in cold frames or boxes, covering the crown of the roots with 6 inches of light soil or strawy manure. Some advise deeper planting, but that will exhaust the strength of the roots much sooner. Cutting from roots thus replanted may begin in 4 weeks. Generally delicious salad may be enjoyed around Christmas time. Try a few rows this year. **Pkt. 10c; 1/2 oz. 15c., oz. 25c; 1/4 lb. 75c; lb. \$2.50. Postpaid.**

690 Prague Giant. Roots are quite smooth, growing as large as a man's fist. They are generally boiled until tender, and served as a salad. **Pkt. 10c; 1/2 oz. 20c; oz. 35c; 1/4 lb. \$1.00. Postpaid.**

Enjoy Good Cucumbers In Your Garden

Davis Perfect (Top Left), Long Green (Lower Left) and Early Fortune (Two Extreme Right)

Next to cabbage and tomatoes the cucumber undoubtedly has the greatest range of usefulness, and the housewife visions pickles long before the seed is in the ground. We grow our seed in high altitudes to insure not only quick but sure results. The varieties offered are the most dependable and cover every possible need in their class. Sow outdoors as soon as soil and weather will permit in hills 4 to 6 feet apart each way. Thin out to the 4 strongest plants. Plant at intervals for succession. Pick fruit as fast as they ripen as it increases the productiveness. Pickling varieties can be planted until the middle of July. One packet of each of these cucumbers planted the same time will give you cucumbers all summer.

A very delicious vegetable, that gives a decided change in the diet. It can be cooked in many tempting ways, especially with our strains, as they do not require soaking in salt water or pressing out before using, and is one of the easiest possible to grow. Sow seed during March indoors, and transplant to the open in June or sow seed in the open when weather permits. Plant 2 feet apart each way.

Endive, a Tasty Salad

Almost everyone loves lettuce; in our opinion Endive has all the good points of lettuce, yet is much more attractive and certainly more highly flavored.

One ounce will sow a 200 foot row. Sow seed from middle of June until August. When fully grown, pull the outer leaves over the center and tie, this will bleach the head a beautiful white.

920 Giant Green Curled. This is the hardiest and most vigorous of the endives, and the quality improves with cooler weather. Quicker to mature and more upright than the other sorts. More ornamental than lettuce. It is crisp, tender, and a very accentuated flavor. **Pkt. 10c; oz. 25c; 1/4 lb. 65c; lb. \$1.50.**

Endive. The delightful salad plant

Select Kale, Kohlrabi, Leek, Lettuce

Dwarf Siberian Kale—a hardy member of the Cabbage tribe

It's well to bear in mind that every class of vegetables has a use distinctly its own, so it is with Kale. Kale furnishes excellent greens for winter and early spring use, with a flavor entirely different than any other vegetable. Frost and cold weather improves it. Sow during May and June in rows, 18 inches apart and cultivate the same as cabbage. For spring use sow during September and cover with litter or straw. It is hardier than cabbage. If the winters are not severe, tender greens can be secured from under the winter covering.

1000 Hardy Siberian. (See illustration.) The hardiest of all the Kales, but less curly than the next. Pkt. 10c; oz. 15c; ¼ lb. 20c; lb. 75c. Postpaid.

1010 Dwarf Green Curled. The leaves resemble handsome, thick plumes, 12 to 14 inches long. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50. Postpaid.

I have used your seeds for many years and they are always great.—Mrs. E. J. Wyatt, Eastpoint, Ga.

Too much praise cannot be said of the seeds bought from you. My mother before me who was a real practical gardener also always found your seeds best.—Mrs. G. G. Bray, Newport News, Va.

Kohlrabi

Kohlrabi belongs to the cabbage family, however, it really is a mild flavored turnip and much easier to grow than turnips. Sow in rows 18 inches apart, early in the spring as weather permits, one oz. sows 300 feet. Repeated sowing insures a crop all summer.

1020 Early White Vienna. (See illustration.) We offer this one variety because it is the earliest and best for every purpose, ready for the table in 60 days, frequently sooner. Very attractive, white flesh, white outer skin, small tops, medium size, mild and sweet. Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 70c; lb. \$2.00.

Paris White Cos, a great August salad

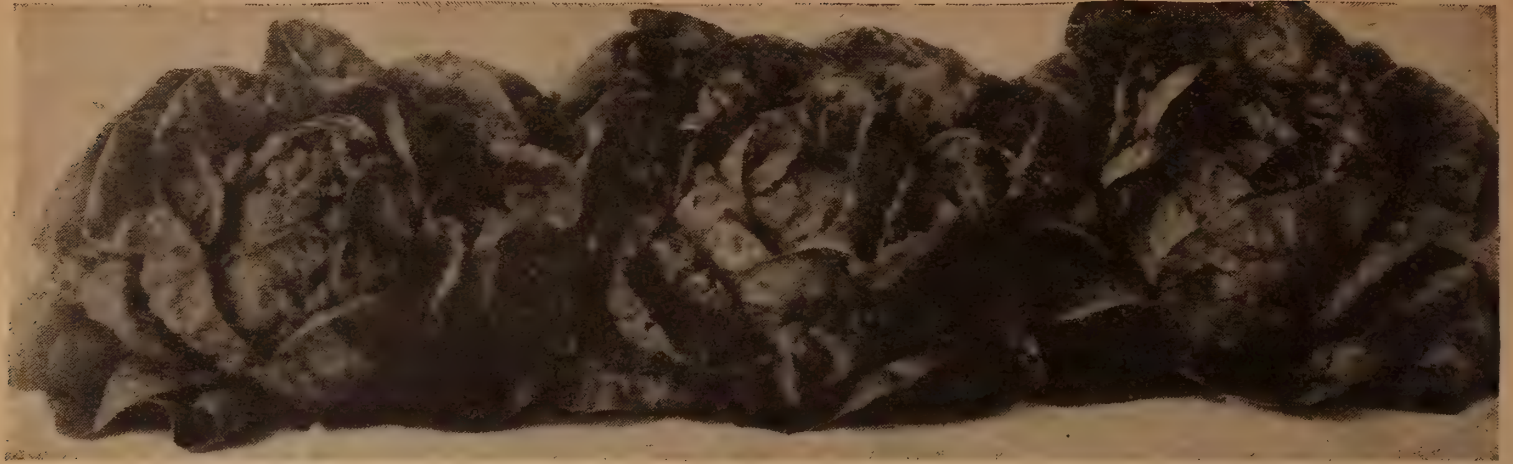

Cos (Romaine) Lettuce

The tendency in growing lettuce for salads, etc., is the heading types of which the Cos variety belongs. It is this type that is used so extensively in hotels and cafes. Differs from the other lettuce in the shape of its leaves, which are long palm or spoon shape. Grow in the same manner as other Lettuce except when, well matured, the outer leaves should be tied together to bleach the inside.

1050 Paris White. (See illustration.) Leaves stand erect. Resists wilt, grows to immense size, and retains its superb equality for a long period. Pkt. 10c; oz. 30c; ¼ lb. 85c; lb. \$2.50. Postpaid.

Childs' Better Lettuce Seed

Crisphead

Big Boston

May King

After the long weary winter, the first real garden thrill comes from the lettuce family. It makes its appearance first and it is lettuce that is ready for the table first. Strange to say, lettuce also gives the last flickering good-bye before the snow flies.

To properly develop and form heads, thin out as soon as the seedlings are 2 to 3 inches tall, to stand 4 inches apart in the row. Later on remove every other one, still later on remove every other one until 16 inches apart in the row. Cultivate thoroughly and often. For the earliest crop sow Black Seeded Simpson. The Butterhead varieties may be planted up to the middle of May, after which seeds should be sown of Iceberg or New York. Toward the end of May, plant Cos Lettuce only. Late August again brings favorable growing conditions for Matchless Big Boston and other head lettuce and early kinds.

1150 Matchless. (See color page 85, for illustration, and page 84 for fuller description.) Considered the tenderest and sweetest of all lettuces and unquestionably the best for the home garden. The crown portion of the head is slightly loose, while the rest is hard. Matures in about 70 days. **Pkt. 25c. Postpaid.**

I am so pleased with your Matchless Lettuce that I'm sending a larger order. As to quality, well this big order tells its own story.—Harry Balm, 7 Oriole Parkway, Toronto, Canada.

1070 Crisphead. (See illustration.) Forms a solid head almost as large as a small cabbage. Of a very superior quality. A quick-grower and the longest keeper of any. **Pkt. 10c; oz. 25c; 1/4 lb. 55c; lb. \$1.50. Postpaid.**

1140 New York or Wonderful. One of the best known market strains. In many sections Truckers will not grow any other. Forms solid heads. Foliage dark green. **Pkt. 10c; oz. 35c; 1/4 lb. 95c; lb. \$2.75.**

1120 Mignonette Lettuce. The small, solid heads blanch creamy white and are tender and sweet. It does not grow very large heads, but they are perfect in quality and extremely hard. **Pkt. 10c; oz. 25c; 1/4 lb. 70c; lb. \$2.00. Postpaid.**

1080 Big Boston. (See illustration.) It is particularly well adopted for early work in the home garden, both outdoors and under glass. Seventy-five days to mature. **Pkt. 10c; oz. 25c; 1/4 lb. 70c; lb. \$1.75. Postpaid.**

1130 Wayahead. A very fine, very early strain of famous May King Butterhead, which it surpasses in every respect. Seventy-five days to mature. **Pkt. 10c; oz. 25c; 1/4 lb. 65c; lb. \$1.75. Postpaid.**

Loose Leaf Lettuce

Melons That Every One Can Easily Grow

One reason we particularly recommend melons for the home garden is because they are practically the only vegetable of a long, long list that can be classed with fruit. Any person can raise melons and they will grow almost anywhere. Even if only a small spot is available a few hills should be planted.

Plant ten seeds in each hill, covering half inch. Hills 4 to 6 feet for Muskmelons and 8 to 10 feet apart for Watermelons. Thin out to four or five plants later. Work fertilizer and sand into each hill. When plants appear, sprinkle with soot or bug death. One ounce will sow about 50 hills.

Muskmelons

1240 Van Buskirk's New Netted King. (See illustration opposite.) A prominent melon grower has this to say about this wonderful muskmelon: "There is no other melon that equals it in any way. It has small seed cavity. It is beautiful to look at. It has exquisite flavor. It is the best shipper. It is the largest yielder. Can be picked at the earliest stage of development." Flesh yellow. One advantage in the growing of onions is the ease with which they may be stored during winter, thus making it an all year around vegetable. In spite of their strong, pungent taste the onion ranks second only to the potato in consumption. Suffice to say any garden would be incomplete without onions. The growing is simple and easy. One ounce for 100 foot row. Five pounds per acre, sow in rows one foot apart just as soon as you can get seed in the soil in the spring. Firm the soil with foot or spade. Thin out to four inches apart.

White Varieties

1300 Mammoth White Silver King. This grows larger than any other white onion. Onions a pound or more in size are common. It is one of the highest bred and hardiest onions grown. Has been developed for uniformity of size, small necks, mildness in flavor (unquestionably the mildest flavored white onion). It is peculiarly adapted to varied soils, thriving everywhere, skin is a beautiful silvery white. Flesh flashing white and tender enough to eat like an apple. Matures in 110 days. **Pkt. 10c; oz. 35c; 1/4 lb. \$1.00; lb. \$3.00. Postpaid.**

1310 Southport White Globe. (See illustration.) Practically as mild in flavor as the Silver King. Personally we consider this variety one of the most attractive and best white onions. Although the skin is extremely thin and delicate in appearance, it is one of the hardiest for general use. It will average about 2 inches in diameter, run fairly uniform in both size and shape. The flesh is pure white, fine grained, very crisp, mild and pleasing flavor. Matures in 120 days. **Pkt. 10c; oz. 40c; 1/4 lb. \$1.20; lb. \$3.50. Postpaid.**

1320 White Portugal or Silver Skin. Produces fine large globe-shaped onions about 2 1/2 inches in diameter. Flesh pearly white, mild, tender, crisp and of finest flavor. Large bulbs mature in 95 days. Sown thickly will produce the finest pickling onions in the world. **Pkt. 10c; oz. 35c; 1/4 lb. \$1.00; lb. \$3.00. Postpaid.**

Somewhat flat but thick through both ways. 100 days. **Pkt. 15c; oz. 25c; 1/4 lb. 75c; lb. \$2.50. Postpaid.**

Peppers and Pumpkins

Royal King Pepper is large, early, sweet and a great yielder

If you have a heart that burns for a fine garden and a soul that yearns for delicious vegetables, we say include peppers. It is a pleasure to grow them. It is a housewife's delight to serve them.

Pepper plants require a long season to develop and bear a crop. Seeds are generally sown early indoors in boxes. As soon as the seedlings make the second or third pair of leaves, transplant in other boxes at least 3 inches each way. Do not set out into the garden until you prepare your Cucumber hills or the tomato patch.

1580 Large Early Neapolitan. (See color illustration on page 85 and fuller description on page 84.) Unquestionably one of the earliest and most prolific of all Sweet Peppers. The fruits are ready within 120 days after seeds are sown, averaging 4 inches long by 2 inches in diameter and single plants frequently carry from 40 to 50 fruits at one time. Bright red, sweet, fine and tender. **Pkt. 15c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$2.00; lb. \$6.00. Postpaid.**

1620 Golden Giant. Never was a vegetable introduced that found such instant demand as this yellow pepper. It seemed as if the ladies were waiting for just such a thing. Similar to Chinese Giant in almost every way except the color. A trifle sweeter and more tasteful than the red varieties. **Pkt. 10c; oz. 60c; 1/4 lb. \$1.75. Postpaid.**

1590 Royal King. (See illustration.) An improved strain of Ruby King, but is vastly superior. Twice as thick meated and much milder. It is very sweet and free from pungency. Unusually prolific. Excellent shipper. **Pkt. 10c; 1/2 oz. 30c; oz. 50c; 1/4 lb. \$1.75. Postpaid.**

1600. Chinese Giant. The largest fruited of all. The plants are most vigorous and thickly set with the blocky, almost square fruits averaging 4 to 5 inches in diameter both ways. The greatest favorite of all for stuffing and salads because of its size and mild flavor. Glossy scarlet when ripe, used as much in the green as ripened stage. **Flesh is very thick and mild. Pkt. 10c; 1/2 oz. 45c; oz. 75c; 1/4 lb. \$2.25. Postpaid.**

1610 Perfection Pimento. Differs from the other peppers in its shape and flavor. Every person nowadays knows what "Pimento flavor" is and that's as near as we can describe it. Heart shape, thick meat, unusually mild and delicious. **Pkt. 10c; 1/2 oz. 35c; oz. 65c; 1/4 lb. \$1.85. Postpaid.**

1630 Small Fruited Sorts Mixed. Comprises Long Red Cayenne, Red Chili and Coral Gem Bouquet varieties. **Pkt. 10c; 1/2 oz. 30c; oz. 50c; 1/4 lb. \$1.75. Postpaid.**

Pumpkins for Pies

Vegetables have many and varied uses, but it remains for the Pumpkin, alphabetically speaking, to be the first to signal its usefulness for pies. Thanksgiving Day has nationalized it. Plant in the corn field, along fences or in some corner where the vines can climb and ramble at will. A general practice, and a good one, is to drop 3 to 5 seeds in every third hill in the corn patch. Where the Pumpkins are grown as a garden crop, the same general requirements as given for Melons and directions for growing them will be found practical.

1650 Everlasting. The best keeper of the Pumpkin family. We have known the same identical pumpkin to take prizes at fairs two years in succession. Rather flat, immense in size. Creamy color. Color of flesh is bright deep orange and very thick, as the seed cavity is small. It is fine grained, cooks easily and is of most delicious flavor. Strong, vigorous grower and exceptionally productive. **Pkt. 10c; oz. 25c; 1/4 lb. 65c; lb. \$1.50. Postpaid.**

The photo inclosed shows the Everlasting Pumpkins I had on one single plant. Had 5 on one runner. I had just as good success with your Hubbard Squash.—A. T. Downing, Littleton, N. Y.

1670 Genuine Mammoth. Also called King of Mammoth or Jumbo, frequently weighs over 150 lbs. Generally grown for Shows and Fairs. For extra large specimens, only one or two fruits should be allowed to develop per vine. **Pkt. 10c; oz. 20c; 1/4 lb. 60c; lb. \$1.50. Postpaid.**

1640 Small Sugar. The standard New England pie Pumpkin. Does not average over 18 inches in diameter, but is thick-fleshed, fine-grained, and of excellent quality. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

Try Our New Leafless Radish

The radish is the King of Relishes. It can be kept in season from May until the following spring, viz.: Very early in April sow seeds of the early globe-shaped, olive-shaped and long kinds. Sow short rows every week, and be sure and thin out the seedlings 1 to 2 inches apart for small kinds, 4 to 6 inches apart for the later, larger growing varieties. After middle of May, sow the Cincinnati Market which will stand August heat. Early in July, sow White Strasburg and Round Black Spanish. White Strasburg ready for use in September, keeps well throughout October. Round Black Spanish matures later and is a fine keeper.

1675 Childs' Leafless or Overnite. (See illustration opposite.) Two years ago we offered the Leafless Radish for the first time and it seems to have taken the country like wild-fire. It almost seems "Overnite" for "12 days from seed to an edible, delicious, tender, sweet, crisp radish on the table" is surely a short time.

Unquestionably the earliest radish grown. It is practically leafless, having usually only two small leaves, hence its earliness. No growing to tops with this great meritorious novelty. Although bred for extreme earliness, it is conceded equally as tender as the tenderest radish grown. It is very globular in shape. Flesh pure glistening white, extremely mild. Unusually crisp, cool, tender and sweet. Delightful flavor, strikingly handsome on the table. The tops are short, average one-half to an inch in diameter. Devoid of pithy woody substance. Keeps its tenderness and freshness for a prolonged period.

The banner variety for the home garden. Especially recommended for the amateur. Particularly suited for the market grower who wants a quick growing radish. **Pkt. 15c; oz. 25c; 1/4 lb. 65c; lb. \$1.75. Postpaid.**

1680 Earliest of All. (Similar in appearance to illustration of Childs' Leafless.) Next to lettuce the

Childs' Leafless or Overnite

first fruits of the garden are radishes, and this is an early radish to grow. Although bred for both extreme earliness and quality, is a very attractive, bright crimson radish. Matures in about two weeks' time and is much used for forcing, bulbs form quickly and fairly uniform with small tops. It presents a striking appearance, shape round. Flesh pearly white, cool, crisp, tender, sweet and toothsome. **Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.50. Postpaid.**

1700 Improved Crisp Sparkler. Claimed by many to be handsomest of all radishes. The scarlet red is especially bright. The white covers almost the lower half of the radish. It is very crisp, solid and sweet. Matures in 25 days and retains its crispness longer than most other varieties. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

1720 Improved French Breakfast. A long olive shaped variety of deep scarlet color with the lower one-third white. Maturing in about 25 days. It has small tops. Flesh is pure white, exceedingly crisp, tender and sweet. A very dependable variety. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

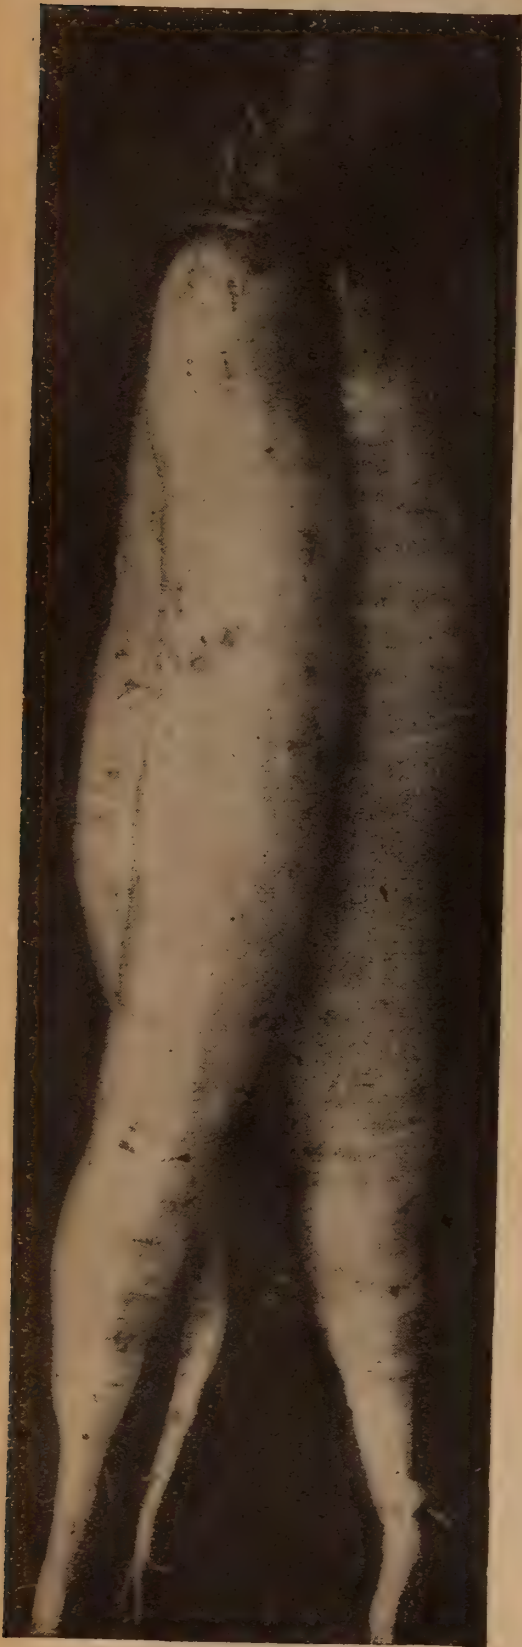

1690 Scarlet Turnip White Tip. (See illustration.) The more critical you are of your radish, the more emphatic your appreciation of this variety. It is a highly bred variety that produces the most attractive glowing scarlet white-tipped radish grown. The flesh is white, solid, crisp, juicy, piquant, pleasing flavor. Begins to form its bulbs as the tops appear. It is conceded one of the most attractive of the radish family. The tops are noticeably small; small tops mean fine radishes. Matures in about 22 days. This variety is unquestionably the most generally grown for both home and market purposes, as it has every requisite of a perfect radish such as earliness, appearance, quality and dependability. The amateur would do well to use it. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

1725 Earliest Forcing. The earliest strain of all the "little round" radishes and particularly suited for extra early radishes in the home garden. Bright scarlet turnip radish, very smooth and round, with small tops, allowing it to be grown closely together in hot-bed or forcing bench. Fine also for out-of-doors. **Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.50. Postpaid.**

Scarlet Turnip White Tipped

Crisp Radishes Summer and Winter

White Icicle, the greatest all-round general purpose Radish for the home garden

1730 White Box. This variety has always been very popular on account of its retaining its tenderness and crispness for weeks after it is even overgrown, which is a very desirable attribute in a radish. It is a full globe shape, slightly flattened. Skin is a pure white, thin and attractive. It is a very tender, crisp, sweet, cool and refreshing variety. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. \$1.00. Postpaid.**

1715 Early Mammoth. Known also as "Chartier." Most important variety for midsummer use, since it remains in tender, brittle condition when all other early kinds become pithy. Tender, and mild in flavor. Its color is deep pink and white. **Pkt. 10c; oz. 20c; 1/4 lb. 45c; lb. \$1.00.**

1750 White Icicle. (See illustration.) The most popular and, we think, the best long white radish in the world. It is as dependable as it is popular. Ready for use in three weeks. Can be used when small. Of crisp, tender, mild flavor. The leaves are short, few in number, and permit of close planting. Roots attain a length of 4 to 6 inches and about 3/4 of an inch thick. It retains its fine table condition longer than any other radish, long, short or round. No better variety could be secured for the home garden. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

1740 Cincinnati Market. Unquestionably the best strain of the long red radishes. Roots 6 to 7 inches long are matured in about 35 days. Rosy scarlet color, with a pure white tip. Short top. Flesh white, tender, crisp, and finest flavor. **Pkt. 10c; oz. 20c; 1/4 lb. 40c; lb. 95c. Postpaid.**

They are at their best averaging 5 inches long by 2 1/2 to 3 inches in diameter at the top. **Pkt. 10c; oz. 20c; 1/4 lb. 35c; lb. \$1.00. Postpaid.**

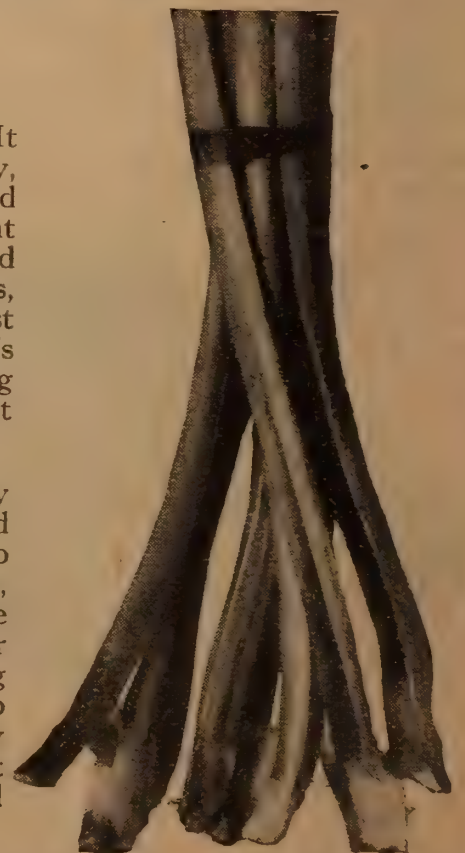

1770 Round Black Spanish Radish. The best of the Winter varieties, developing 3 to 4 inch roots, almost perfectly globe-shaped, late in September from seeds sown the middle of July. The flesh is white, very compact, pungent and well flavored. Will keep well stored all winter. Matures in about 55 days. **Pkt. 10c; oz. 20c; 1/4 lb. 45c; lb. \$1.25.**

Rhubarb

Rhubarb is the true harbinger of spring. It is one of the first to shoot up its tender, juicy, luscious stalks. Once established it should last a lifetime. It is the one outstanding plant in the varied uses it can be put to. It is used as a vegetable, as a dessert, in pies, jams, jellies, sauce. It can be used with almost every other kind of fruit. It's a tonic, it's

stimulating, it's beautiful. Can be served either raw or cooked. Old and young alike crave it, relish it, love it. Find a place for it somewhere, even if it must be your neighbor's yard.

1800 Crimson Giant. (See illustration.) We have in the course of many years discovered two outstanding essentials in Rhubarb, viz:—flavor and stringiness. All other attributes, all other varieties, all else, in fact, count as to nothing. For this reason we center our activities upon the Giant Crimson, knowing it is the best, the most reasonable, the hardiest, the sweetest, the tenderest, the most stringless and the most dependable. It seems to thrive under positive neglect. Shoots up quickly in the spring. It is the sweetest, most pleasing flavored rhubarb ever grown (and we have tried them all). It tastes similar to Raspberry and Strawberry combined. When cooked, its high color is especially attractive. The skin is thin, the flesh firm, brittle and tender. Color is bright crimson, except the young newly started shoots. Try this and you will discard all others. **Pkt. 10c; oz. 25c; 1/4 lb. 75c; lb. \$2.25. Postpaid.**

Spinach the Great Body Builder

Spinach is accredited with being the vegetable that contains most body building essentials. Spinach is fed to the ailing, to the strong, the rich and the poor. Some families eat it twice a day. Every one should have it 3 to 7 times a week. The body requires it. The best thing in the world for the busy working man. Sow in 18 inch rows, thin out to 5 inches apart. New Zealand should be sown in 3 to 5 foot rows, 18 inches apart in the row.

1805 Childs' Tree Spinach. Again it remains for Childs to introduce something supremely good. This is a tree spinach, grows upright in small bush form and the leaves are used the same as Spinach. We only have a small amount of seed hence offer it in packets only. **Pkt. 15c.**

1810 King of Denmark. It has the ability to withstand the scorching sun without running to seed and still be fresh, tender and green. Grows in compact form, round, thick, dark green crumpled leaves. **Pkt. 10c; oz. 15c; 1/4 lb. 40c; lb. \$1.00.**

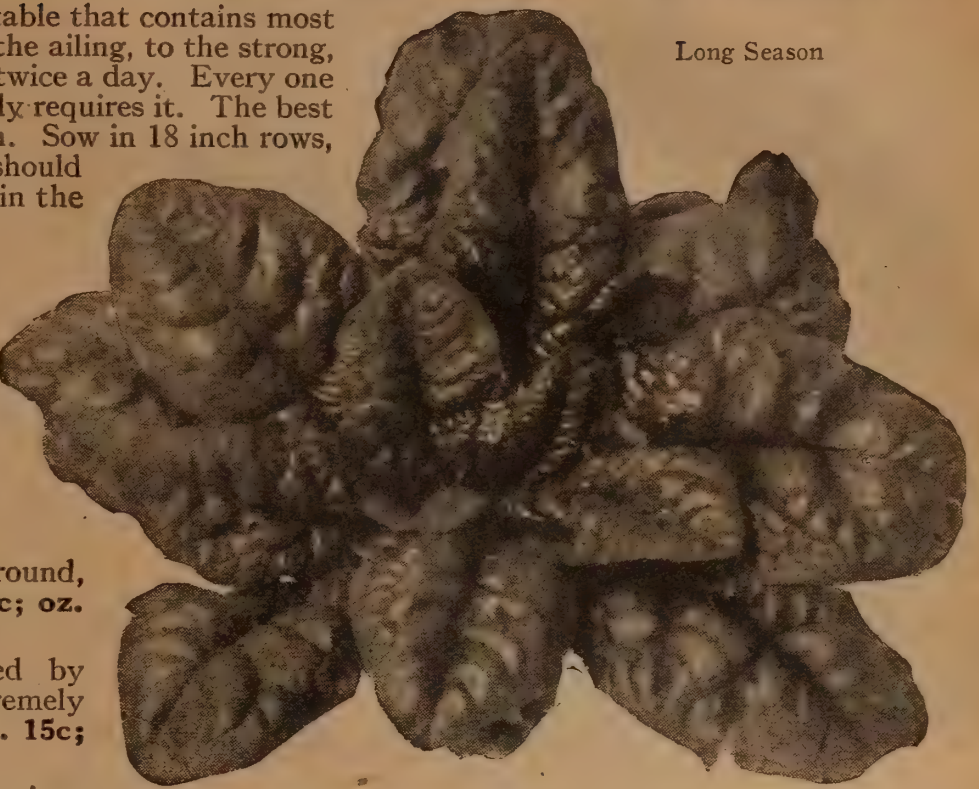

1830 Norfolk Savoy Leaved. Preferred by many for Fall planting since it endures extremely cold weather in good shape. **Pkt. 10c; oz. 15c; 1/4 lb. 25c; lb. 60c. Postpaid.**

1820 Long Season. (See illustration.) Derives

its name from its ability to resist heat for prolonged periods, without going to seed or getting uneatable. It is very tender and sweet. Can be enjoyed continuously throughout the season. Leaves are a rich dark green, very thick, crumpled and finest quality. **Pkt. 10c; oz. 15c; 1/4 lb. 25c; lb. 60c. Postpaid.**

1840 New Zealand. A rather spreading plant, making an extremely vigorous and rapid growth after passing the seedling stage. Well developed plants will cover a space 5 feet wide in all directions. The tender tips of the branches and the leaves furnish fine greens. The greatest perpetual bearing Spinach for Mid-Summer. **Pkt. 10c; oz. 15c; 1/4 lb. 35c; lb. \$1.00. Postpaid.**

1835 Winter Prickly. Hardest variety. Vigorous. Productive. Pointed leaves. Slow flowering. **Pkt. 10c; oz. 15c; 1/4 lb. 25c; lb. 60c.**

Long Season

Sandwich Island Salsify

Salsify or Oyster Plant

Grow in the manner suggested for Parsnips. Thin out to 4 inches apart in the row when large enough to handle. They are boiled and creamed or grated and made into patties which, fried, possess oyster-like flavor, hence the title "Oyster Plant."

1850 Sandwich Island Mammoth. (See illustration.) Produces thick, smooth, brown roots with pure white flesh. The standard everywhere. Has very pronounced oyster flavor. Is an extremely delicious variety. It is large, vigorous growing, with long smooth tapering roots. Matures in 140 days. Roots of this variety may be left in the ground all winter, as freezing will not hurt them. Stores well in the cellar. **Pkt. 10c; 1/2 oz. 20c; oz. 30c; 1/4 lb. 85c; lb. \$2.50. Postpaid.**

Childs' Squash, Something Better

Golden Summer Crookneck and Early White Bush

1910 Cocozelle Bush. See preceding page (page 79) for illustration. Long Island gardeners are making large sums growing and selling this variety. One gardener near Hempstead says he has customers come 30 miles just to get this variety because it can be used in all stages. Highly prized because it contains unusual quantities of the valuable element called Vitamines. Doctors prescribe Summer Squash for children to make them sturdy. A 15 foot row of this in our trial grounds last summer yielded about 50 fruits. Wherever there are children in the family, this Squash should be grown. Compact bush growth with dark green foliage, oblong shape, 12 inches or more long, 4 or 5 inches in diameter. Skin dark green with still darker green stripe. **Pkt. 10c; oz. 25c; 1/4 lb. 50c; lb. \$1.35. Postpaid.**

1915 Delicious. This is unquestionably the finest of the Hubbard types. The skin is almost free from warts. The flesh is exceptionally fine grained, sweet and it is unquestionably the most delicious squash of this class.

It grows of medium size or to about 8 to 10 lbs. Is an excellent keeper. Will keep until late spring. Matures in about 100 days. It gets its name from its fine sweet flavor. **Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.25. Postpaid.**

1870 Giant Summer Crookneck. (See illustration.) It would be hard to over-rate the merits of this squash. It is so extremely delicious that it is hard to eat in moderation. It is a treat that always carries a hankering for more. Matures in about 70 days. Although they are delicious when fully matured, they are vastly more so if used before they fully mature. Skin is a beautiful deep orange. The flesh is a rich salmon-orange. **Pkt. 10c; oz. 20c; 1/4 lb. 45c; lb. \$1.15. Postpaid.**

1917 Squash Seed Mixed. All varieties mixed for the small garden. **Pkt. 15c; oz. 25c; 1/4 lb. 60c; lb. \$1.25. Postpaid.**

For the amount spent for one squash from your grocery man you could buy the seed to grow squash enough to keep a family of six for a year. The summer varieties make the most tempting, tasteful, appetizing dishes imaginable, especially Cocozelle Bush. The winter varieties, also exceptionally delicious, can be kept throughout the winter with the greatest of ease. Sow in hills 6 to 8 feet apart usually any time after May 15th. Sow bush varieties in rows 3 feet apart and 18 inches apart in the rows.

1860 Early White Bush. (See illustration.) This improved bush squash is vastly superior to the old deeply scalloped type in the amount of flesh they contain and the supremely good flavor. The white bush always has had a very good reputation for yield. It matures in about 70 days, which is very early for the squashes. Average about 12 inches in size. Very fine grained. Sweet and delicious. Of true bush habit. Clear white color. Fruits flat and inclined to scallop. **Pkt. 10c; oz. 15c; 1/4 lb. 40c; lb. 95c. Postpaid.**

1890 True Improved Hubbard. (See two illustrations below.) This is the old hard shelled variety that was about all our grandmothers would bank on, much improved and most of the warts eliminated. So it stands today, unquestionably the best known, best liked of the entire squash family. It is by far the best for winter storage. It differs in flavor from the summer varieties and is a truly delicious winter dish. It is a good home and market variety. It is of vigorous, hardy, trailing growth. Rich dark bronze green in color. Moderately warted. Hard shell. The flesh is bright orange-yellow, fine grained, thick, dry and rich. Requires 120 days to mature.

Pkt. 10c; oz. 15c; 1/4 lb. 45c; lb. \$1.15. Postpaid.

1900 Golden Hubbard. This is the most productive of the Hubbards. It is the same shape and type as the True Hubbard, but the shell is orange-red color, a trifle smaller in size and contains more warts. Matures in about 105 days.

Flesh is deep gold, much richer looking than the green variety. Very fine flavored. A good keeper.

Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.20. Postpaid.

Childs' Highly Bred Turnips

Although Turnips come last alphabetically, it ranks as one of the first in Vitamines, the great life builder. The varieties below have a mild, delicious flavor. Eat plenty of them and keep well. Sow as early as possible in spring.

For fall and winter use sow Purple Top White Globe and American Purple Top Rutabagas any time in July. Sow thinly in rows 18 inches apart, and thin out Turnips to 8 inches in the row, and Rutabagas 14 to 18 inches. One ounce sows a 100 foot row. One pound sows one acre in drills.

2090 Japanese Mammoth. One of our old timers. Introduced years ago by us. Still the best turnip for table use. Unquestionably the largest. Frequently reaches 15 lbs. in size. Very few orders for vegetable seeds reach us without this superb turnip being ordered. It is a sound variety. Pure white color. Very solid and very sweet. Best for the late summer. A fine keeper and unexcelled for stock feeding. Seldom fails to take first prize at Exhibitions. **Pkt. 15c; oz. 25c; 1/4 lb. 75c; lb. \$1.95.**

2100 Early White Milan. This is an extremely quick maturing turnip of a clear white ivory color and perfectly smooth white skin. It develops so rapidly that even the skin is tender and the whole turnip can be eaten like an apple. The flavor is pleasingly mild. The flesh is tender, crisp, cool and sweet. Ready for use in 40 days. **Pkt. 10c; oz. 15c; 1/4 lb. 40c; lb. \$1.00. Postpaid.**

2120 White Egg. In many ways is the best for the small garden, especially for the beginner. It matures early and is adapted to both spring and fall sowing. Egg-shaped, about one-third longer than it is broad. Has a very smooth skin. Matures in about 70 days. Flesh is white, tender and sweet. **Pkt. 10c; oz. 15c; 1/4 lb. 35c; lb. \$1.00. Postpaid.**

2105 White Quality. This turnip is delicately flavored, exceedingly crisp and tender and white in color. Size medium. This turnip holds unsurpassed tenderness and crispness. **Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.50.**

2110 Purple Top White Globe. (See illustration.) This is the most popular of the turnips. It is very attractive, almost perfect ball-shape, ideal size, heavy yielder, and excellent keeper. It is large, upper portion purple, lower part white. Tenderest in the stages before fully matured. Fine stock feed. The flesh is white, tender, fine grained and mild in flavor. 50 days. **Pkt. 10c; oz. 15c; 1/4 lb. 35c; lb. \$1.00. Postpaid.**

2130 Yellow or Amber Globe. A good variety to sow at the same time as the earlies. The skin is smooth and yellow. The flesh is light yellow, fine grained, firm and sweet. Large size and is excellent for both table and stock feeding. An excellent sort for milk cows. **Pkt. 10c; oz. 15c; 1/4 lb. 35c; lb. 85c. Postpaid.**

Purple Top White Globe

Rutabaga or Swede Turnips

Swede Turnips, or as we know them best—Rutabagas—are now more generally used for table use than any of the turnips. As a ration for stock feeding turnips are now a recognized essential. Economy on the dairy farm cannot be accomplished without generous feedings of Turnips, Mangels and Carrots. Cattle, horses, hogs, sheep and poultry do best, require less grain and hay, when fed root crops. Try them this year.

2140 American Purple Top. In recent years this variety has supplanted the Turnip in many gardens and on many farms because many prefer the Rutabaga for table use to the Turnips, also because it will keep to perfection all winter until late the following spring. One of the best Rutabagas for table or stock feeding. It is the sweetest; the largest; the best looking; the biggest cropper; the easiest to harvest; the best keeper; the most even in size; ripens most uniformly. The flesh is fine grained, golden yellow, mild flavored, solid and sweet. **Pkt. 10c; oz. 15c; 1/4 lb. 30c; lb. 75c. Postpaid.**

2115 Neylon Neckless. Popular with growers who market in New York City. It is a Turnip without a neck (no more neck than a Parsnip). Color amber-yellow with a slight purple top. Large and uniform in size. The quickest growing Rutabaga we know. Flavor delicate and fine. **Pkt. 10c; oz. 25c; 1/4 lb. 70c; lb. \$2.00.**

2150 Large White Rock. The roots of pure white color, slightly shaded green at the top. The flesh is white, firm and sweet. **Pkt. 10c; oz. 15c; 1/4 lb. 30c; lb. 85c. Postpaid.**

From the Guelph, Ontario Daily Herald: "Father Swift ripened a few White Tomatoes in the rectory garden of the Church of Our Lady. Seed saved from those few specimens produced the fine plants which have been noticed in these columns. The variety is known as Childs' Snowball and was originated by John Lewis Childs, of Floral Park, New York. While residing in New York City, Father Swift had the pleasure of inspecting the Childs' Nursery, greenhouses and trial grounds."

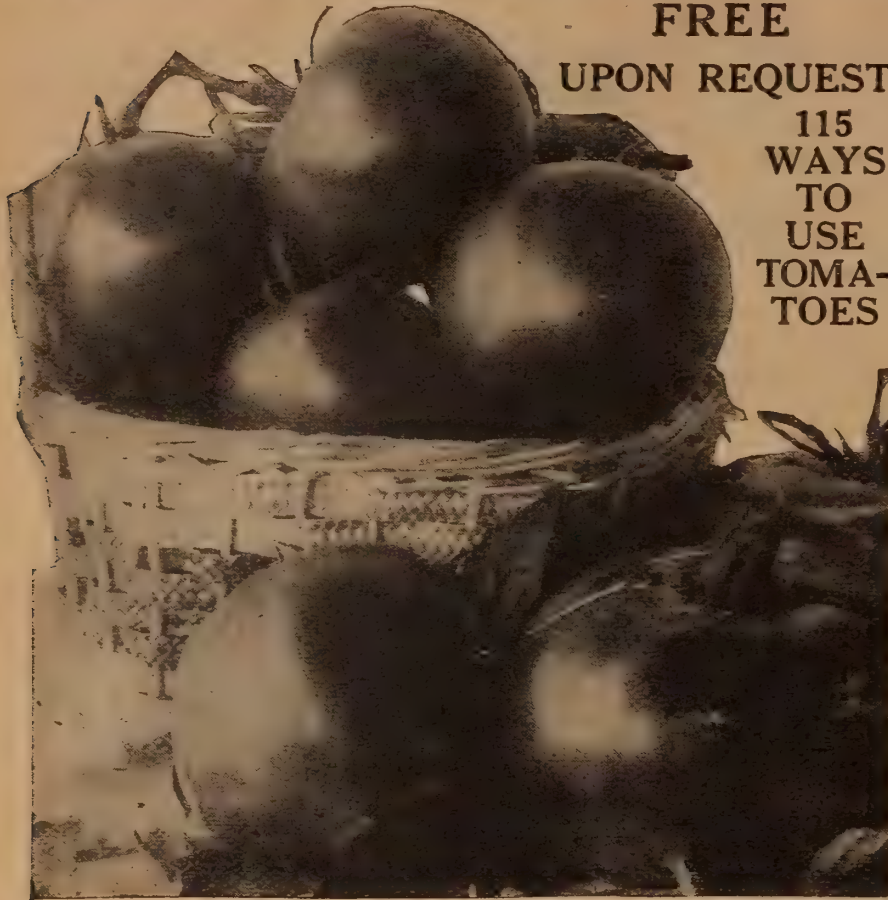

I had great success with Beefsteak Tomatoes. Some of them weighed 2 pounds and were twenty inches in circumference. But the greatest surprise was in slicing them to find no hard, unripe center, as is the case with very large Tomatoes.—J. B. Waddell, Lonoke, Ark.

Five New Tomatoes

Shown In Color On Inside Rear Cover

1975 Childs' Earliest Producer. Somehow or other we all watch and wait for early tomatoes. Here is an extra early tomato that will require less waiting than any. It matures in 95 days. Especially in the northern districts it is valuable, as it is a quick maturing type.

The fruits are of fine size, brilliant scarlet color. Ripens uniformly. Nearly round. Entirely smooth. Flesh solid. Finest flavor. Very productive. Tough skin. Good keeper. Fine shipper. **Pkt. 20c; 1/2 oz. 45c; oz. 85c; 1/4 lb. \$2.50; lb. \$7.50. Postpaid.**

1977 Diener. Reach the enormous weight of three pounds, average fruit about one pound. The flesh is more solid than any variety known. It is a magnificent dark red shade which makes it very attractive.

It is very sweet and free from acid. The yield is enormous, absolutely blight resisting. It is medium late in ripening, but carries its enormous load of fruit until fall.

Pkt. 20c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$2.25; lb. \$7.00.

1985 Beefsteak, or Two-Pound. The popular conception of a perfect Tomato is a large, solid, meaty fruit that will cut into thick ruby slices. This new sort is probably the largest of all Tomatoes, and the richest crimson color. **Pkt. 15c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$2.25; lb. \$7.00.**

2015 Childs' Snowball. A Tomato so white that it shows only a faint tinge of straw color. The most beautiful fruit you ever saw, large, smooth, very solid and finest quality. **Pkt. 15c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$2.25; lb. \$7.00.**

2010 Golden Jubilee. A yellow tomato of immense size. Single specimens frequently reach 2 lbs. in weight. The fruits are round and solid. Contains but few seeds. The flesh meaty, extremely sweet and mild in flavor. It is unusually pretty. Its eating quality is superior to the red and purple sorts on account of its exceptional sweetness. 125 days. **Pkt. 15c; 1/2 oz. 30c; oz. 55c; 1/4 lb. \$1.65; lb. \$5.00. Postpaid.**

Tomatoes are especially rich in vitamins. Great crops of fine fruits may be grown even in limited space. Sow seeds early in April indoors. When seedlings are 2 to 3 inches tall, transplant them 2 to 3 inches apart in other boxes. Harden gradually by freely exposing them to the air, and by May 15th set them into the garden in well prepared spots, 2 1/2 to 3 feet apart each way.

Great crops of red or purple fruits may be grown by either raising several varieties bearing in succession, or by the same kind, by repeated sowings. The best practice is to provide plants of different varieties maturing in succession.

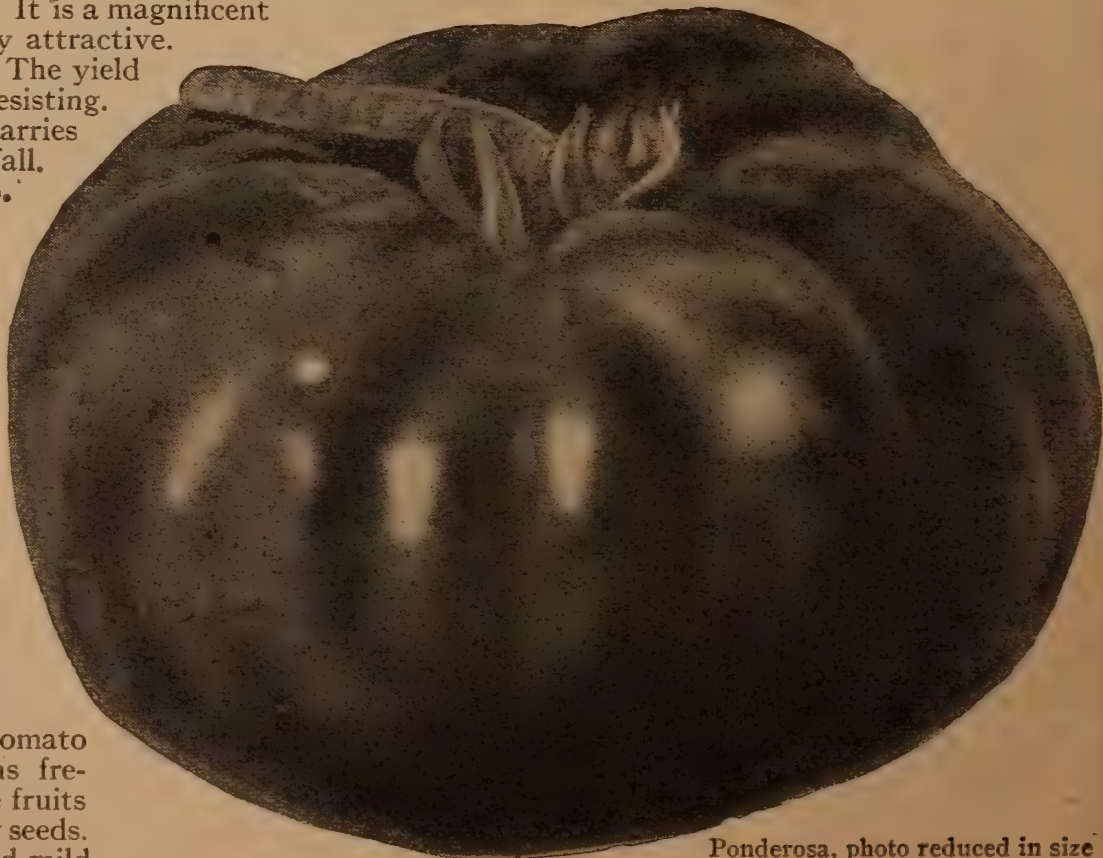

Purple Skin Varieties

1920 June Pink. One of the earliest of all, fruits in about 100 days. It is quite solid, of distinctly mild flavor. It has only a short season of bearing, however, so no home gardener should grow this sort exclusively, but it surely should be in every home garden. **Pkt. 10c; 1/2 oz. 25c; oz. 45c; 1/4 lb. \$1.25; lb. \$3.75. Postpaid.**

1930 Globe. This finest of all purple varieties may well be termed the acme of perfection. Of symmetrical globe-shape, with delicious deep red flesh, an ideal home garden and market garden variety. Were we confined to one variety, it would be Globe. It has no superior in solidity, contains few seeds, and for canning we consider it the equal of any scarlet variety. Fruits within 110 days. **Pkt. 15c; 1/2 oz. 30c; oz. 55c; 1/4 lb. \$1.65; lb. \$5.00. Postpaid.**

1950 Ponderosa. (See illustration.) The largest tomato grown and unsurpassed in thick flesh, lusciousness, freedom of seeds and superb flavor. Deep purple. Oblong, ribbed. A great family garden sort for big crops. **Pkt. 15c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$1.85; lb. \$5.50. Postpaid.**

1940 Trucker's Favorite. Flattened shape but deep. Solid, finest quality. **Pkt. 10c; 1/2 oz. 25c; oz. 45c; 1/4 lb. \$1.35; lb. \$4.00. Postpaid.**

Ponderosa, photo reduced in size

Tomatoes Are a Specialty With Us

Bright Red Sorts

For canning these are greatly preferred because of their richer, deeper red color. All scarlet sorts are of greater acidity than the purples.

1960 Bonny Best. (See illustration opposite.) Bonny Best is ready for picking from 100 to 105 days after seeds are sown. Where staked, as shown in illustration, with the plants reduced to the three strongest branches, it is very difficult indeed to beat Bonny Best in yield. Fruits average 3 inches in diameter, are slightly flattened, and borne in handsome clusters. Very heavy crop producer. **Pkt. 10c; 1/2 oz. 25c; oz. 40c; 1/4 lb. \$1.25; lb. \$3.75. Postpaid.**

1970 Matchless. The greatest scarlet main crop sort in cultivation. Bears magnificent 8 to 10 oz. fruits. Few seed cells break up the solid crimson flesh, which is also of delightful quality. Matures in about 120 days. A great home garden variety. **Pkt. 10c; 1/2 oz. 25c; oz. 40c; 1/4 lb. \$1.25; lb. \$3.75.**

1980 Dwarf Stone. Grows distinctly upright with close, stocky joints, so that well developed specimens do not average over 3 feet high. For best results, the individual plants should be supported with a stake, however. The fruits average about 3 inches in diameter. Plants may be set 2 feet apart each way. Matures in about 130 days. If undecided which variety to grow, try this one. **Pkt. 10c; 1/2 oz. 25c; oz. 45c; 1/4 lb. \$1.25; lb. \$3.75. Postpaid.**

1990 Select Stone. Considered one of the leading general purpose and main crop tomatoes. The fruit is very large, deep, bright scarlet, smooth, exceedingly solid, firm flesh, and of superb flavor. Fruits ripen evenly, even to the stem end. Has no superior for slicing, home canning and commercial canning, tomato soup, catsup, etc. This is the variety generally used for select basket trade. The safer type for the beginner. Matures in about 130 days. This variety will always reward you with a fine crop. **Pkt. 10c; 1/2 oz. 25c; oz. 40c; 1/4 lb. \$1.00; lb. \$3.00. Postpaid.**

2000 John Baer. (See illustration below.) Valued for its small seed cavity and freedom from seeds (which also account for the high price of the seed). It is one of the best flavored, in fact the quality is wonderful. One of the heaviest yielding. Size is larger, flesh solid and luscious. Matures in about 125 days. **Pkt. 10c; 1/2 oz. 25c; oz. 45c; 1/4 lb. \$1.25; lb. \$3.75. Postpaid.**

Had Tomatoes from your Beefsteak Tomato which weighed 2 1/2 pounds each and were perfect, not one but dozens that weight.—Mrs W. R. Dawson, Roanoke, Va.

Have grown your Earliest Producer Tomatoes three years and they are the best all around Tomato I have ever seen.—Mrs. Frank Davis Jordan Valley, Oregon.

Gardeners Who Know Use Childs' Seeds

The Snowball Tomato I got from you is a wonder. It is the best Tomato I ever ate. I have some now that weigh 1 1/4 lbs. and have still larger ones on the plants to ripen. People in the neighborhood think it a wonder to see a white Tomato.—W. H. Klein, Catasauqua, Pa.

Beefsteak Tomatoes test out perfect. Found same to be better than your catalog praise. It certainly is the best I have ever found as containing the least acidity, and this climate is not adapted to Tomato raising.—F. E. Bonner, Copenhagen, N. Y.

I never had such tomatoes as I have had this year of the Diener variety, purchased from you. There must be at least a bushel to a plant and of a size and flavor I never saw equalled.—C. D. Wedrick, Nanticoke, Ontario, Canada.

My Golden Jubilee Tomatoes took the prize at our county fair last fall.—Mrs. Otis Moore, Dover, N. J.

I took first prize of \$5.00 with your Tomato at the San Antonio Home-grown Vegetable Exhibit, as being the finest variety shown. It is all you claim for it.—Aug. Weisbroch, San Antonio, Texas.

I have had great success with your Beefsteak Tomato. From seventy-four vines I have already taken seven or eight bushels, and they are still bearing. Have had fruit that weighed two pounds each. It is fine for canning.—J. H. Tarbert, Madison, Ga.

You sent me a free packet of the John Baer Tomato last year and I never saw a finer Tomato, that is uniform in size, no core, a beautiful red, very little seeds, and a very well flavored Tomato.—Miss J. Schelters, Milwaukee, Wis.

I was very much pleased with the John Baer Tomato of last year. The best Tomato I can recommend.—Mrs. L. E. Taylor, Lawrence, S. C.

The Six Vegetable Aristocrats

See Color Illustrations Opposite 

Corn—60 Day or Makegood Unquestionably the earliest of all Sweet Corns. Full 10 days earlier than Golden Bantam and just as sweet. Truck Gardeners in and around New York reap big profits from our "60 Day" because it's the first on the market. Many gardeners make more on our "60 Day Corn" than they do the rest of their crops. We mention these facts so you will know how extremely early and sweet it is. It is rich and juicy. Just as sweet as the famous White Cory. It has a more desirable shape than any sweet corn.

It is pearly white in color, plump, fat, luscious kernels that fairly melt. Stalks grow about 3 feet high, usually bearing two ears each. They do not sucker. As compared to the plant itself the ears are enormous. We have never introduced a vegetable that we have had more pride in.

Corn—Childs' Golden 60 Day Same as above in every way except it is of golden color and the ear a trifle more pointed.

An occasional cob may show an odd white kernel.

765 Pkt. 20c; 1/2 lb. 35c; lb. 60c; 2 lbs. \$1.00. Postpaid. 5 lbs. \$2.25; 10 lbs. \$4.25; 25 lbs. \$9.75. Not Postpaid.

Lettuce—Childs' Matchless This is another introduction of our own, that we are mighty proud of. It is something decidedly different from any other lettuce and far more meritorious. In fact it is unequalled.

It is a hybrid which forms a long loose head which for tenderness and brittleness is truly marvelous. It is so crisp, so brittle that it snaps or breaks like celery or glass, hence not recommended as a shipper but unquestionably the home garden variety of all varieties. No other lettuce has a flavor like it or superior to it.

No better variety is known for general home growing or table use. It has a peculiar formation of growth that resembles a cross until it starts heading. If you want the finest, best flavored, crispest lettuce possible to be had—then use this. If it isn't all we claim for it we will refund your money.

1150 Pkt. 25c.

Pepper—Neapolitan We never have been able to enthuse over other peppers as we have this delightfully mild variety. It has many attributes that place it, in our opinion, the best all around pepper to grow. (See illustration opposite.)

It is by far the mildest of all the large peppers. It is unquestionably the earliest of all large red peppers. Better yet, it is the most productive large pepper. A combination for a perfect pepper. Hence our reason for considering it the best of all the peppers. The strong vigorous plants grow 2 feet high and fully 18 inches across. They are laden completely with large handsome fruits, bearing continuously until frost.

Single plants carry from 35 to 50 marketable fruits at one time. The peppers grow upright until they become so heavy that their own weight turns them down. The skin and flesh are bright red, sweet and mild.

1580 Pkt. 15c; 1/2 oz. 40c; oz. 75c; 1/4 lb. \$2.00; lb. \$6.00. Postpaid.

Pea—Prizewinner An early wrinkled pea that we are proud to offer. Matures in about 8 weeks; in fact, under favorable conditions it frequently matures earlier.

Nor has it lost any of its luscious sweet flavor in its earliness. It is a tender melting delicious pea of the highest quality. Unlike all extra early peas it is of large size, filled with mammoth peas.

For market trade or main crop it has no superior. The semi-dwarf vines grow about 18 to 24 inches high and are of vigorous hardy growth. The pods are of a dark green color and about 4 1/2 inches long. Plump and round when filled. It is unusually productive. Exceptionally sweet. Delightfully luscious.

1505 Pkt. 15c; 1/2 lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.10. Postpaid. 10 lbs. or more 35c per lb. Not postpaid.

Beet—Rajah This really wonderful winter beet has become more popular from year to year, since we first offered it and is in a class by itself for winter use. Whoever wishes to enjoy the delicious flavor and tenderness of June beets all winter has only to grow this sort, and store it in a cellar for winter's use. It will keep perfectly until new beets are ready again in the spring. You will find it tender and delicious as a June beet up to May the following spring. Early beets are considered of little value for winter's use, as they become tough and flavorless, but with the Rajah you have a beet that is suitable for summer, the best for fall and winter. It is exceedingly smooth, almost heart-shaped and under good cultivation will grow to 4 1/2 lbs. Color blackish blood-red. Foliage light green. Distinct from all other beets.

400 Pkt. 15c; oz. 35c; 1/4 lb. \$1.00; lb. \$3.00. Postpaid.

Muskmelon—Childs' Supreme A truly magnificent and distinct melon. The largest in size and the finest in quality.

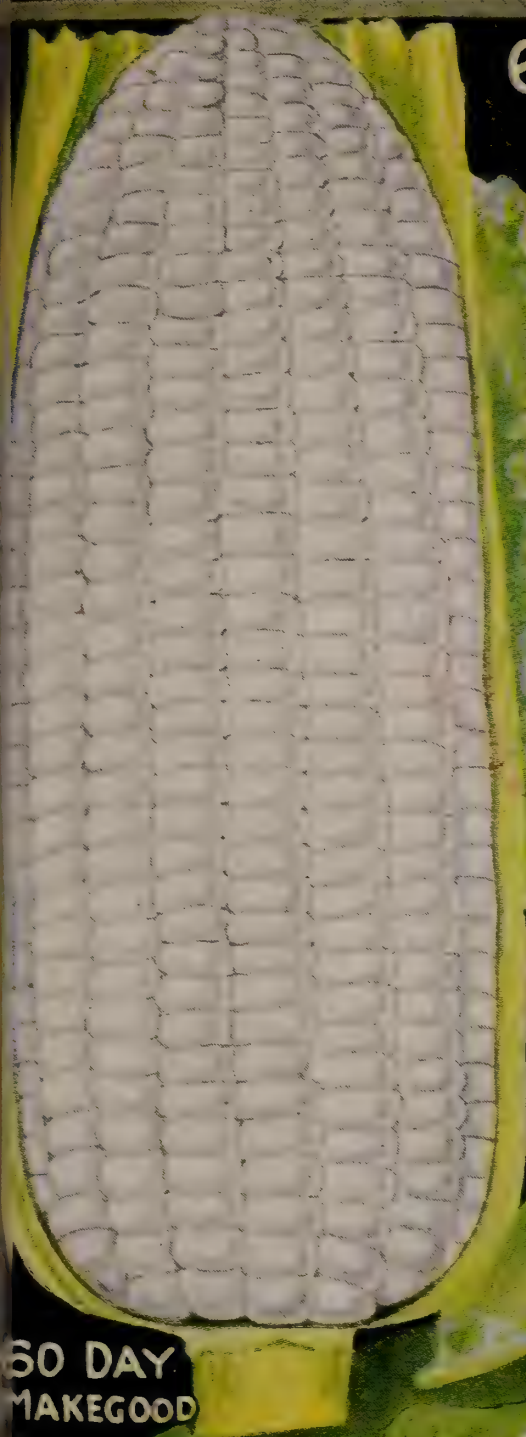

It is the shape and color of Emerald Gem, but does not have its objectionable softness when ripe. Childs' Supreme grows from 15 to 18 lbs. and more. Color, deep emerald-green outside, with more or less netting, while the flesh is a fine deep salmon and of unusual thickness. Its quality is like that of Emerald Gem when at its best. The richest and most delicious flavor, tender and melting with absolutely no hard substance. People who find that most melons disagree with them can eat this one as there is no solid indigestible substance about it. A strong, vigorous healthy grower, succeeding under conditions that bring failure to many other varieties. Fruit of this melon readily sells in all markets on account of its mammoth size and fine appearance.

Childs' Hardy Long Island Chrysanthemums

We have always and rightfully claimed that plants produced on Long Island have a hardiness and constitutional vigor that is superior to plants grown in other States even where it is so cold the thermometer drops out of sight. The above map shows how we are surrounded by the ocean and swept by the heavy salt winds, mists and fogs. An atmospheric condition that makes all vegetation extremely vigorous and hardy. See descriptive matter top of page 3. Our Chrysanthemums are noted for their hardiness and vigor. They flower splendidly out of doors year after year. If potted late, and pinched back, they make compact little house plants.

We pay the postage and deliver right to your door. No extra express charges if you buy from Childs.

Ampelopsis, Veitchi

(See illustration opposite.) The best wall climber. Clings by suckers thrown out along the vines to brick, stones, etc., that is a wall of living green the summer through, turning in autumn to a crimson that is fairly gorgeous. This is the vine you invariably see on brick and stucco houses, office buildings, churches, hospitals, industrial plants, fences and out-buildings. On brick stucco, cement, plaster and rough surfaces it requires no tying up, or supports to make it cling to the surface. It is the vine of vines for all uses. Once started it will last a lifetime. In a very few months it will completely cover an ordinary building. Plant 2 feet apart. Start it in the proper direction, then let it look out for itself.

Big Field Grown Roses On Own Roots

Winter Gem

You cannot afford to buy elsewhere if you want the best in Roses. Strong 1-year Field Grown Dormant Roses that bloom profusely the first year. Guaranteed to have a Root System equal to most 2-year-olds bought elsewhere

Vastly superior to anything we have ever offered before. Just the thing for the Amateur and Novice. No suckers to grow up and produce inferior wild roses. No need to worry about the rose "running-out" and becoming a poor type.

Our Big Roots—Two-year-old Field-Grown Roses are a sensation. As big as most 3-year-olds and will win your admiration on sight. If not superior to any rose bush bought elsewhere—you may return at our expense. Gorgeous Bloom the first year. Large healthy flowers that will make you swell with pride.

Read this before buying Roses anywhere

We are one of the very few seedsmen who sell Roses grown on their own roots. We do not sell Budded or Grafted Rose Bushes. Our reason is this—fully ninety per cent of grafted or budded roses throw out suckers from the roots which in time predominate the plant and all you get is either a non-flowering bush or a lot of wild-flower looking roses. This does not occur with own-root roses.

It would pay you to pay \$5.00 for an own-root rose rather than grow budded or grafted stock. Ask any authority. Cost but a few cents more than the widely advertised bench-grown varieties of grafted bushes.

America's Leading Dahlia House

With Each Dahlia Order We Will Send Explicit Instructions How To Grow Mammoth Dahlias

Childs for a full half century have been and continue to be America's Leading Dahlia House. We list only the varieties that we consider generally useful for the average grower, although we grow many other varieties. During the past 52 years we have produced many new varieties, of which Sunkiss, the Two-in-One Dahlia, continues supreme, regardless of the many new ones since.

On page 87 we picture, and on page 3 describe Long Island's advantages in producing Bulbs, Plants and Roots of a Constitutional Vigor that cannot be surpassed. In no other plant does the Latent Life assert itself as in Dahlias. In no other plant has Long Island grown vigor been more evident than in the Dahlia. From all sections testimonials reach us of the superiority of Childs' Dahlias. From all sections orders from a satisfied trade roll in.

Dahlia Plants

We feel that many of our customers have the wrong idea about Dahlia Plants not being as satisfactory as Roots. Just why they should think so we cannot say, but to all who think so, we wish to state that plants will do everything that roots will do, with the added advantage of producing more bloom, bigger bloom, longer stems, blooms several weeks earlier and just as late. Practically all large Exhibition or Show blooms are from plants. All our prizes are won from blooms from plants. This year plants everywhere did better than tubers.

Our Great Sunkiss Dahlia

THE GREAT TWO-IN-ONE DAHLIA

6840. This magnificent Dahlia continues to be as much of a sensation today as it did the first time we exhibited it at the New York Show. At that time it captured the "twelve and twenty-five vases" class prize and was the talk of the show. It is unquestionably the most beautiful, most attractive, and most pleasing introduction of many years. It has received an "Award of Merit," the highest honor possible to receive.

It is a Giant in size. The color combination is conceded one of the most beautiful and most harmonious expressed in any flower. It is a Hybrid Cactus of glorious form, composed of broad petals which roll up appearing like large quills which are a rosy-salmon, set on a full double center of lively canary-yellow.

6840 Plants Only. Each \$1.50; 3 for \$4.25; 10 for \$13.50. Postpaid. (We cannot supply tubers.)

IRIS SIBIRICA
ORIENTALIS

Childs' Are the Originators of the Large Flowering Gladiolus

The large flowering Gladioli grown and sold everywhere all over the world were introduced by us. The botanical name is Childsi (named after us). (See any Botanical Encyclopedia.) Does it not follow that the clearest, newest, finest strains should be best from the original source of supply? As real new meritorious types are produced we catalog them, but never, no never, do we introduce a new variety unless it is distinct enough to be of unusual merit. We are the real Gladiolus Pioneers.

Plant any time from April to July in any fairly good soil, well spaded. Set in rows six inches apart, or in masses four inches apart each way.

Two Wonderful New Glads'

5598 Joerg's White. Unquestionably the largest flowered of all Gladioli. No other white has the lustre and sheen. No other white seems so white as this one. Most white varieties appear like "pigmies" alongside of this.

Measures 5½ inches across and nearly 20 inches in length. Flower stems average 36 inches. Two, often three stems, to the bulb. Won highest awards from American Gladiolus Society, also New York Horticultural Society. **Each \$2.00; doz. \$20.00. Postpaid.**

5467 Childs' Arlene. A new Gladiolus just out. Beautiful to behold. Fascinating to an extreme. Most exquisite color combination. The ground is a uniform pink shading in the throat to a pale flesh-pink with deep crimson base. The lower petals are marked on inner two-thirds with a bright, velvety, crimson-scarlet zone, which extends all the way across the petal in a semi-circle form, and runs down into the throat. **Each \$2.50; doz. \$25.00.**

Joerg's White

Childs' Nationally Known Ferns

Personii

Ferns are perhaps the most attractive and useful plants we have for the house. The smaller growing varieties are unexcelled as dainty table decorations and the large sorts make elegant specimen plants. We make a specialty of Ferns. Long Island is the natural home of the Fern. America's Leading Plant House

Resurrection Plant

We sell more Resurrection Plants than we do of any other single plant we catalog. It is most fascinating and interesting.

A ball of tightly folded leaflets, dry and dead. Drop it in a bowl of water and in a short time there is a great, loose, expanded rosette of fine, green, fern-like leaves, both odd and beautiful. This can be repeated many times.

6515 Each 10c; 3 for 25c. Postpaid.

Sanseveria

Zealanica. (See illustration.) There is scarcely a decorative plant used that is more striking in foliage and habit than this. It will grow in a dark hall, cool bedroom, or stand on a mantel in a heated room. It will stand gas and dust, and will go for months without a drop of water, yet remain as thrifty as ever. Erect, rigid, sword-like leaves, thick and fleshy, dark green with bars of white.

16890. Each 45c; 3 for \$1.25. Postpaid.

Streptosolen

Amabilis Magnifica. (See color illustration on inside cover and page 1 for further description.) Absolutely the freest-flowering pot plant in cultivation. It is full of bloom all the time. How a plant can support such a wealth of flowers day after day, week after week, month after month, is a mystery. One of the easiest pot or window plants to grow that it is possible to find.

16910 *Amabilis Mag.* Each 40c; 3 for \$1.00.

Swainsonia

Few plants equal this in beauty and general good qualities. These clusters appear at the axils of the leaves, and are in bloom at all times.

16920 **Large White.** Each 35c; 3 for 90c.

Fertilizers For Lawns

The use of lime on a lawn is just a waste of money. Lawns require but four things, viz.: Fertilizer, Humus, Renovating (additional seed) and Water. Sheep manure gives quick results. Bone meal lasting results. Humus holds the moisture and fertilizer near the roots. New seed is needed for the bare spots. Every lawn requires fertilizer each year if a luxurious velvety sward is desired.

Sheep Manure. For quick rapid results use Sheep Manure. We guarantee the quality. Analysis—1 1/2-1-2 100 pounds for each 3,000 square feet. F. O. B. Floral Park: **Price, 25 lbs. \$1.25; 50 lbs. \$2.00; 100 lbs. \$3.50; 500 lbs. \$17.00; 1,000 lbs. \$30.00; 2,000 lbs. \$55.00; bags free.**
